Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Industry Measures Section,
Industry Product Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0579) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnement et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des mesures industrielles,
Division du produit industriel,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0579) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

A Note on CANSIM®

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The last pages contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve constant price Gross Domestic Product, monthly, without seasonal adjustment, you must use "D 144336".

For further information write to **CANSIM** Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note au sujet de CANSIM®

Les données figurant dans cette publication ont été extraites de **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les dernières pages renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries de **CANSIM**. Ainsi, pour extraire le produit intérieur brut en prix constants mensuel avant désaisonnalisation, il suffit d'utiliser "D 144336".

Pour plus de renseignements, écrivez à **CANSIM** Division, Statistique Canada, Ottawa, K1A 0Z8, ou téléphoner à (613) 995-7406.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 61 provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods. Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, no 2, rév. 3 Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Gross Domestic Product and its components may be obtained from the following Statistics Canada publications:

Catalogue 61-213. *Gross Domestic Product by Industry*, 1980 issue, for the 1971-1980 period.

Catalogue 61-005. *Gross Domestic Product by Industry*, the July/August 1981 issue and current issues for the reference period beginning January 1981.

The same data are available in the following **CANSIM** matrices:

	Matrix numbers
Gross Domestic Product:	
Monthly	1131
Quarterly	1130
Annual	1125-1129

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in **CANSIM** matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Gross Domestic Product and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry — (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following **CANSIM** matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUES

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur brut et de ses composantes sur la base 1971 = 100 à partir de 1971:

N° 61-213 au catalogue. *Produit intérieur brut par industrie*, publication de 1980 consacrée à la période 1971-1980.

N° 61-005 au catalogue. *Produit intérieur brut par industrie*, l'édition de juillet/août 1981 et les publications courantes présentent des données pour la période de référence commençant en janvier 1981.

On peut obtenir les mêmes données des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur brut:	
Mensuel	1131
Trimestriel	1130
Annuel	1125-1129

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de **CANSIM** ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur brut et les composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry — (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur réel:	
Annuel	383
Trimestriel	15
Mensuel	1421
Indice de la production industrielle:	
Annuel	384
Mensuel	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-502. See this publication for description of concepts, sources and methods for the Index of Industrial Production.

Catalogue 61-505. See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of Origin.

Catalogue 61-506. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

Catalogue 61-510. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept.

Catalogue 61-516. See this publication for technical note concerning the introduction of annual estimates of Real Domestic Product by industry expressed in constant dollars, the incorporation of the results of the 1971 census of merchandising and services for a large number of the service-producing industries, the introduction of annual estimates of gross output, intermediate input, and value added in current and constant (1961) prices and the corresponding implicit price indexes, for selected manufacturing industries and the adoption of the final 1961 weighting system.

Catalogue 61-213. See the 1971-1974 issue for the technical note concerning the implementation of a 1971 weight and reference base and the adoption of the 1970 Standard Industrial Classification. See this issue concerning revisions to the 1971 (base year) Gross Domestic Product distribution and the introduction of annual estimates of gross output, intermediate inputs and value added in current year prices and in constant (1971) prices for all industries. See Appendix 1 for 1) a complete distribution of Gross Domestic Product, 2) the types of indicators used and 3) a quality assessment for both published and unpublished industry estimates. See Appendix 2 for the content of the "Industry Groupings" and Appendix 3 for the content of the "Groupings of Industries by Demand Category".

CONCEPTS, SOURCES ET MÉTHODES

Nº 61-502 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

Nº 61-505 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

Nº 61-506 au catalogue. Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

Nº 61-510F au catalogue. Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entraîné l'introduction du concept "d'activité totale".

Nº 61-516 au catalogue. Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars constants, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

Nº 61-213 au catalogue. Se rapporter à la note technique de la livraison de 1971-1974 concernant l'introduction des bases de référence et de pondération de 1971 et l'adoption de la Classification des Activités Économiques de 1970. Se rapporter à cette livraison concernant les révisions à la distribution du produit intérieur brut de 1971 (année de référence) et l'introduction des estimations de la production brute, la consommation intermédiaire et la valeur ajoutée en prix de l'année courante et en prix constants de 1971 pour toutes les industries. Se rapporter à l'appendice 1 pour 1) une distribution détaillée du produit intérieur brut, 2) les types de projecteurs et 3) une évaluation qualitative-concernant les estimations publiées et non publiées par industrie. Se rapporter à l'appendice 2 pour les listes d'industries comprises dans chaque agrégat d'activités économiques et, à l'appendice 3, pour celles comprises dans chaque groupe d'activités économiques par type de demande.

TECHNICAL NOTE

This issue of the publication "Gross Domestic Product by Industry" presents annual estimates in current and constant (1971) prices for the total economy by industry, and monthly and quarterly estimates of gross domestic product in constant (1971) prices. Quarterly and monthly data are presented in both seasonally adjusted and unadjusted form.

A number of improvements have been introduced in this publication. Annual estimates in current prices, formerly restricted to manufacturing, have been prepared for all industries in the economy. The timeliness of the estimates for the manufacturing industries has been improved by one year to cover the period 1971-1979.

In addition, to assist users in analysis of the data, special aggregations of gross domestic product by demand category have been prepared. Each industry's total gross domestic product has been assigned to a demand or use category according to the major use or disposition of its production (see Appendix III for a listing of the contents of each demand category).

The data in this publication represent the first phase of an historical revision. Revisions to previously published data are due to the incorporation of statistical revisions to data series underlying the estimates, the introduction of some methodological changes, and in the case of the monthly and quarterly measures, the incorporation of revised seasonal factors.

The gross domestic product (GDP) estimates in this publication are based on the establishment as the statistical unit. The use of the establishment as the basic unit usually results in a different industrial distribution from that contained in Table 28 of the National Income and Expenditure Accounts (catalogue 13-201). The estimates in that table have been prepared by summing labour income and inventory valuation adjustments — based on the establishment — and data for investment income and for capital consumption allowances collected and tabulated using the company or enterprise as the basic statistical unit.

In preparing estimates of an industry's production, all activities of establishments classified to the industry are included, that is, the "total activity" concept is used. Thus if an establishment classified to manufacturing also transports and sells its own goods at the wholesale level, these secondary activities will be included in the establishment's production and therefore in the manufacturing industry. Furthermore, the industry includes establishments classified to all sectors of the economy — government, business and personal.

In addition to GDP estimates, gross output and intermediate input estimates have been prepared by industry. At the industry level the gross output and intermediate

NOTE TECHNIQUE

Ce numéro de la publication "Produit intérieur brut par industrie" contient des estimations annuelles par industrie (branche d'activité) en prix courants et constants (1971) pour l'ensemble de l'économie, et des estimations mensuelles et trimestrielles du produit intérieur brut en prix constants (1971). Les données trimestrielles et mensuelles sont publiées sous forme désaisonnalisée et non désaisonnalisée.

Un certain nombre d'améliorations ont été apportées à la publication. Des estimations annuelles en prix courants ont été préparées pour la totalité des branches d'activité alors qu'elles ne portaient que sur le secteur manufacturier par le passé. Les délais de production des estimations pour les branches d'activité manufacturière ont été réduits d'une année et les estimations présentées dans ce numéro portent donc sur la période allant de 1971 à 1979.

En outre, afin d'aider les utilisateurs dans l'analyse des données, on a élaboré des agrégats spéciaux du produit intérieur brut par catégorie de demande. Le produit intérieur brut total de chaque branche d'activité a été affecté à une catégorie de demande selon la principale utilisation de sa production (voir l'appendice III pour une liste du contenu de chaque catégorie de demande).

Les données de cette publication constituent la première étape d'une révision chronologique des données. Les révisions apportées aux données publiées par le passé sont dues aux révisions statistiques des séries qui servent de base aux estimations, à certaines modifications méthodologiques, et, dans le cas des mesures mensuelles et trimestrielles, à l'utilisation de coefficients saisonniers révisés.

L'établissement constitue l'unité statistique qui sert de base aux estimations du produit intérieur brut (PIB) présentées ici. L'utilisation de l'établissement comme unité de base se traduit généralement par une répartition par branche d'activité différente de celle qui est présentée au tableau 28 des comptes nationaux des revenus et des dépenses (n° 13-201 au catalogue). On a obtenu ces estimations en additionnant le revenu du travail et les ajustements de valeur des stocks selon l'établissement et les données qui ont été recueillies et totalisées sur les revenus de placement et les déductions pour amortissement, et qui ont la compagnie ou l'entreprise comme unité statistique de base.

Pour l'estimation de la production d'une branche d'activité, on prend en considération toutes les activités des établissements qui ont été classées à cette branche d'activité, c'est-à-dire qu'on se base sur le concept d'"ensemble des activités". Ainsi, si un établissement qui a été classé au secteur manufacturier transporte et vend en gros ses propres produits, ces activités secondaires feront partie de la production de l'établissement et, par conséquent, de celle du secteur manufacturier. En outre, la branche d'activité comprend des établissements classés à tous les secteurs de l'économie, qu'il s'agisse d'administrations publiques, d'entreprises ou de particuliers.

En plus des estimations du PIB, on a préparé des estimations de la production brute et des entrées intermédiaires par branche d'activité. On obtient ces estimations en prenant la somme de

input estimates are the sum of the individual establishments. No attempt has been made to eliminate transactions between establishments within the same industry, that is, to derive "net sector" estimates.

The current price estimates of GDP at factor cost (or value added) by industry can be measured directly by summing the factor incomes and depreciation or indirectly by deducting the cost of the intermediate goods and services used in the production process from the value of gross production or output. The method adopted for any particular industry is determined by the availability of data. If possible, estimates based on both methods have been prepared and discrepancies have been resolved.

Gross output is frequently estimated as the sum of sales and inventory change for finished goods and work-in-progress. Because the System of National Accounts uses an accrual method of valuation, typically the reported value of inventory change must be adjusted by the amount of the change which can be attributed to changes in prices (this is called the "inventory valuation adjustment"). The revalued inventory change is called "the value of the physical change" in inventories. Similarly, intermediate inputs must be adjusted to take account of the extent to which raw materials used in production during the current period were purchased in a previous period.

For any industry, gross output can be described as the total of all costs, intermediate and factor. In some cases, particularly for the non-commercial industries, data on gross output are not available and must be estimated indirectly as the sum of total costs. In many of these industries, data on intermediate inputs are not available on an establishment basis so that GDP has been used as a proxy for gross output. It should be noted that for trade, the gross output is the total value of sales, rather than the gross margin⁽¹⁾. This applies also to secondary trading activity in other industries.

Constant price series represent the revaluation of quantities of production using prices of a base period. In principle constant price data should be derived by deflating current price data by a currently weighted (Paasche) price index to yield a base-weighted (Laspeyres) quantum series. In practice true Paasche price indexes do not exist so this procedure is approximated by using Laspeyres price indexes to deflate the values of commodities (goods or services) produced or used at the lowest level of commodity detail possible. Constant dollar data for individual commodities may also be derived by multiplying current period quantities of production by their price in the base year. The constant dollar data for gross output or intermediate inputs is the sum of the values for the individual commodities.

(1) Gross margin is defined as sales less cost of goods sold.

ces données pour les différents établissements. On n'a pas éliminé les transactions entre les établissements au sein d'une même branche d'activité, en d'autres termes, on n'a pas essayé d'obtenir d'estimations nettes pour le secteur.

On peut estimer le PIB en prix courants, au coût des facteurs (ou valeur ajoutée) par branche d'activité de façon directe en additionnant les revenus des facteurs et l'amortissement ou, de façon indirecte, en déduisant de la valeur de la production brute le coût des biens et services intermédiaires qui ont été utilisés au cours de la production. Le choix de la méthode pour une branche déterminée dépend de l'existence des données. Dans la mesure du possible, on a effectué des estimations selon les deux méthodes et on a réconcilié les divergences.

On estime souvent la production brute à l'aide de la somme des ventes et des variations des stocks pour les produits finis et les produits en cours. Comme le système de comptabilité nationale se base sur une méthode de comptabilité d'exercice, il arrive souvent que la valeur déclarée de la variation des stocks doive être ajustée par la partie de la variation imputable à la variation des prix. C'est ce qu'on appelle "l'ajustement de la valeur des stocks". La variation réévaluée correspond à la "valeur de la variation matérielle" des stocks. De même, les entrées intermédiaires doivent être ajustées afin de tenir compte des matières premières qui ont été utilisées dans la production au cours de la période courante mais qui ont été achetées durant une autre période.

On peut représenter la production brute de toute branche d'activité comme le total de ses coûts, qu'il s'agisse d'entrées intermédiaires ou de facteurs de production. Dans certains cas, particulièrement pour les branches d'activité non commerciales, il n'existe pas de données sur la production brute et il faut estimer celle-ci indirectement à partir de la somme des coûts totaux. Dans un grand nombre de ces branches d'activité, nous ne disposons pas de données sur les entrées intermédiaires pour l'établissement et il faut se servir du PIB à la place de la production brute. À noter que, dans le commerce, la production brute correspond à la valeur totale des ventes plutôt qu'à la marge brute⁽¹⁾. C'est également le cas des activités commerciales secondaires dans les autres branches d'activité.

Les séries en prix constants résultent d'une réévaluation des quantités produites à l'aide des prix d'une période de base. Pour calculer ces séries, on doit en principe procéder à la déflation des données en prix courants à l'aide d'un indice des prix à pondération courante (indice de Paasche) afin d'obtenir une série de quantité pondérée en fonction de l'année de base (indice de Laspeyres). En pratique, il n'existe pas de vrais indices de Paasche et on se contente d'utiliser des indices de Laspeyres pour corriger de leur variations de prix les valeurs des biens ou services (produits ou utilisés) au plus bas niveau de détail possible. On peut également obtenir des données en dollars constants pour des marchandises déterminées en multipliant les quantités produites durant la période courante par leur prix durant l'année de base. Pour obtenir la production brute ou les entrées intermédiaires en dollars constants, on calcule la somme des valeurs pour les différentes marchandises.

(1) La marge brute est définie comme la valeur des ventes moins le coût des biens vendus.

The constant price series for GDP is derived as the difference between gross output and intermediate inputs in constant prices. This technique is called "double deflation".

For some industries, data limitations do not permit the use of the double deflation technique. In these cases, the constant price estimates of GDP may be based on the movement of gross output or intermediate inputs by assuming a fixed relationship between gross output and intermediate inputs. In other cases, labour input may be used as a projector of output — sometimes with an estimated productivity change. Other related projectors may also be used. Appendix I contains a listing of the types of indicators used in the preparation of constant price estimates.

For the monthly measures, it is generally true that there are many fewer data available to prepare the estimates and these data are usually not as reliable as the annual data. In only a few cases are data available to permit the preparation of gross output and intermediate input estimates. The monthly data usually do not include secondary activities and they may not cover all establishments in the industry or all commodities produced by the industry.

The relationship between annual and monthly measures in the period for which both are available is used to estimate necessary adjustments to the monthly data in the current period. At the end of the current calendar year a preliminary review of the monthly estimates is undertaken and they may be revised in the light of other related data.

The monthly data are also adjusted by a factor that reflects variations in the number of "trading days" within each month to derive the seasonally unadjusted data and by a seasonal adjustment factor to derive the seasonally adjusted data. The seasonal adjustment factors are derived using the "X-11 Arima"(2) method. Any trading day adjustments generated by this program are based not only on the number of days in the month but also on the relative importance of each day of the week.

(2) A variant developed by Statistics Canada on the "X-11" method originally developed by the U.S. Bureau of the Census.

On obtient les séries en prix constants du PIB en calculant la différence entre la production brute et les entrées intermédiaires en prix constants. C'est ce qu'on appelle la "double déflation".

Dans certaines branches d'activité, les limites des données ne permettent pas d'utiliser la technique de la double déflation. Dans ce cas, on peut faire reposer les estimations du PIB en prix constants sur les variations de la production brute ou des entrées intermédiaires si l'on suppose une relation fixe entre la première et les dernières. Dans d'autres cas, on peut se servir des entrées de main-d'oeuvre et même faire varier leur productivité pour projeter la production. Il existe également d'autres bases de projection. L'appendice I contient une liste des types d'indicateurs qui servent à la préparation des estimations en prix constants.

Pour les mesures mensuelles, il est vrai qu'il y a généralement beaucoup moins de données sur lesquelles fonder les estimations. En outre, ces données sont habituellement moins fiables que les données annuelles. Ce n'est que rarement que les données permettent l'estimation de la production brute et des entrées intermédiaires. En règle générale, les données mensuelles ne portent pas sur les activités secondaires et il arrive qu'elles ne comprennent pas tous les établissements d'une branche d'activité ou tous les produits fabriqués par une branche d'activité.

Pour estimer les ajustements qu'il faut apporter aux données mensuelles de la période courante, on se fonde sur la relation entre les mesures annuelles et mensuelles au cours des périodes pour lesquelles on dispose des deux types de données. À la fin de l'année civile courante, on entreprend un examen préliminaire des estimations mensuelles et on procède éventuellement à leur révision à l'aide d'autres données.

Les données mensuelles pour la série non désaisonnalisée sont corrigées à l'aide d'un facteur qui traduit les variations dans le nombre de "jours commerciaux" pour chaque mois tandis que les données pour la série désaisonnalisée le sont au moyen d'un coefficient de désaisonnalisation. Les coefficients de désaisonnalisation sont obtenus grâce à la méthode "X-11-ARMMI"(2). Les corrections se rapportant aux jours commerciaux sont fondées sur le nombre de jours dans le mois et sur l'importance relative de chaque jour de la semaine.

(2) Une variante élaborée par Statistique Canada à partir de la méthode "X-11" mise au point par le U.S. Bureau of the Census.

REVISIONS TO GROSS DOMESTIC PRODUCT IN CONSTANT (1971) PRICES

The revisions to GDP apply to the period 1971 to 1980.

Annual measures of GDP have been calculated for an additional year, revisions to source data have been incorporated and methodology has been changed for some industries.

The monthly data have been revised due to the incorporation of the latest annual levels, revisions to the monthly data on which the output indexes are based, changes in the methodology for several industries and revisions to the seasonal factors.

The revisions to year-to-year movements in certain aggregates are included in the following table.

RÉVISIONS DU PRODUIT INTÉRIEUR BRUT EN PRIX CONSTANTS DE 1971

Les révisions au PIB concernent la période allant de 1971 à 1980.

On a calculé les chiffres annuels du PIB pour une année supplémentaire, puis incorporé des révisions aux données de référence et changé la méthodologie pour un certain nombre d'activités économiques.

Les données mensuelles ont été révisées en vue de prendre en compte l'incorporation des niveaux annuels les plus récents, les modifications apportées aux données mensuelles servant au calcul des indices de production, les changements méthodologiques pour plusieurs branches d'activité et les révisions des facteurs saisonniers.

Le tableau suivant présente les révisions apportées aux variations annuelles de certains agrégats.

Revisions to Year-to-year Percentage Change in Gross Domestic Product and Major Aggregates
(constant 1971 prices)

Révisions aux variations annuelles en pourcentage du produit intérieur brut et des principaux agrégats
(en prix constant de 1971)

TABLE 3. Estimates of Values in Current and Constant (1971) Prices and Implicit Price Indexes - Continued

TABLÉAU 3. Valeurs estimées en prix courants et constants de 1971 et indices implicites des prix - suite

	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980	1981
Clothing stores											
Magasins de vêtements											
Values in current prices - Valeurs en prix courants:											
Gross output - \$ millions - Production brute	1,657.7	1,802.2	1,936.2	2,142.2	2,430.5	2,785.8	2,902.8	3,217.6	3,650.3		
Index - 1971=100 - Indice	100.0	108.7	116.8	129.2	146.6	168.1	175.1	194.1	220.2		
Intermediate inputs - \$ millions - Consommation intermédiaire	1,297.7	1,385.4	1,506.6	1,684.0	1,853.8	2,116.9	2,230.0	2,432.6	2,842.1		
Index - 1971=100 - Indice	100.0	106.8	116.1	129.8	142.9	163.1	171.8	187.5	219.0		
Gross domestic product - \$ millions - Produit intérieur brut	359.8	416.9	429.6	458.2	576.7	668.9	672.9	784.8	808.0		
Index - 1971=100 - Indice	100.0	115.9	119.4	127.3	160.3	185.9	187.0	218.1	224.6		
Values in constant prices - Valeurs en prix constants:											
Gross output - \$ millions - Production brute	1,657.7	1,765.8	1,817.7	1,833.9	1,939.9	2,168.4	2,127.8	2,238.4	2,353.6	2,360.6	
Index - 1971=100 - Indice	100.0	106.5	109.7	110.6	117.0	130.8	128.4	135.0	142.0	142.4	
Intermediate inputs - \$ millions - Consommation intermédiaire	1,297.7	1,382.4	1,421.6	1,434.7	1,518.7	1,697.7	1,667.0	1,754.4	1,844.4	1,850.6	
Index - 1971=100 - Indice	100.0	106.5	109.5	110.6	117.0	130.8	128.5	135.2	142.1	142.6	
Gross domestic product - \$ millions - Produit intérieur brut	359.8	383.5	396.1	399.2	421.0	470.7	460.7	484.1	509.2	510.0	
Index - 1971=100 - Indice	100.0	106.6	110.1	111.0	117.0	130.8	128.0	134.5	141.5	141.7	
Implicit price indexes - 1971=100 - Indices implicites des prix:											
Gross output - Production brute	100.0	102.1	106.5	116.8	125.3	128.5	136.4	143.7	155.1		
Intermediate input - Consommation intermédiaire	100.0	100.2	106.0	117.4	122.1	124.7	133.8	138.7	154.1		
Gross domestic product - Produit intérieur brut	100.0	108.7	108.5	114.6	137.0	142.1	146.1	162.1	158.7		
Hardware stores											
Quincailleries											
Values in current prices - Valeurs en prix courants:											
Gross output - \$ millions - Production brute	400.6	445.0	467.8	551.4	605.9	666.4	697.0	736.7	789.1		
Index - 1971=100 - Indice	100.0	111.1	116.8	137.6	151.2	166.4	174.0	183.9	197.0		
Intermediate inputs - \$ millions - Consommation intermédiaire	317.7	351.4	373.2	460.0	496.4	534.4	591.8	601.7	680.6		
Index - 1971=100 - Indice	100.0	110.6	117.5	144.8	156.2	168.2	186.3	189.4	214.2		
Gross domestic product - \$ millions - Produit intérieur brut	82.9	93.6	94.6	91.4	109.5	132.0	105.2	135.0	108.5		
Index - 1971=100 - Indice	100.0	112.9	114.1	110.3	132.1	159.2	126.9	162.8	130.9		
Values in constant prices - Valeurs en prix constants:											
Gross output - \$ millions - Production brute	400.6	431.7	444.7	466.5	459.7	477.0	474.5	470.5	463.9	439.6	
Index - 1971=100 - Indice	100.0	107.8	111.0	116.5	114.8	119.1	118.4	117.4	115.8	109.7	
Intermediate inputs - \$ millions - Consommation intermédiaire	317.7	342.3	352.6	369.9	364.6	378.3	376.2	373.1	367.8	348.6	
Index - 1971=100 - Indice	100.0	107.7	111.0	116.4	114.8	119.1	118.4	117.4	115.8	109.7	
Gross domestic product - \$ millions - Produit intérieur brut	82.9	89.4	92.1	96.6	95.2	98.3	98.2	97.4	96.0	91.0	
Index - 1971=100 - Indice	100.0	107.8	111.1	116.5	114.8	119.2	118.5	117.5	115.8	109.8	
Implicit price indexes - 1971=100 - Indices implicites des prix:											
Gross output - Production brute	100.0	103.1	105.2	118.2	131.8	139.7	146.9	156.6	170.1		
Intermediate input - Consommation intermédiaire	100.0	102.7	105.8	124.4	136.1	141.3	157.3	161.3	185.0		
Gross domestic product - Produit intérieur brut	100.0	104.7	102.7	94.6	115.0	133.6	107.1	138.6	113.0		

TABLE 3. Estimates of Values in Current and Constant (1971) Prices and Implicit Price Indexes - Continued

Appendix I

DESCRIPTION OF GROSS DOMESTIC PRODUCT BY INDUSTRY

This appendix shows the 1971 Gross Domestic Product distribution, the types of indicators used, an assessment of the quality of the measures and the publication level and pattern for annual and monthly data. Quarterly data are calculated from the monthly data.

The **types of indicators** used are shown at the most detailed industry working level. A bracket indicates that the annual estimates are based on the monthly projector. A blank in the monthly indicator column denotes that no estimate is prepared at that level. The following symbols have been used for the various indicators:

- N - Value Added
- G - Gross Output
- I - Intermediate Input
- L - Labour Input
- LD - Labour and Depreciation
- O - Other
- ... - Not Applicable

The appendix also provides an **assessment of the quality of the estimates** of Gross Domestic Product at the most detailed industry working level. While it is not possible to quantify the margin of error in the estimates of Gross Domestic Product it is possible to provide a somewhat subjective indication of the quality. The following rating system is therefore offered by way of an informed opinion of the relative over-all quality of the estimates of Gross Domestic Product for each industry:

- 1 - Very Good
- 2 - Good
- 3 - Acceptable
- 4 - Poor

Appendice I

DESCRIPTION DU PRODUIT INTÉRIEUR BRUT PAR INDUSTRIE

Cet appendice présente la distribution du produit intérieur brut pour 1971, les types de projecteurs utilisés, une évaluation de la qualité des mesures et une liste des données annuelles et mensuelles publiées. Les données trimestrielles sont calculées à partir des données mensuelles.

Les **types de projecteurs** utilisés sont présentés au niveau de calcul d'industrie le plus désagregé possible. Une parenthèse indique que les estimations annuelles sont compilées à partir du projecteur mensuel. Un espace blanc dans la colonne du projecteur mensuel signifie qu'aucune estimation n'est faite à ce niveau. Les symboles suivants sont utilisés pour les projecteurs:

- N - valeur ajoutée
- B - production brute
- I - consommation intermédiaire
- T - travail
- TD - travail et dépréciation
- A - autres
- ... - n'ayant pas lieu de figurer

L'appendice présente également une **évaluation qualitative** des estimations du produit intérieur brut calculées au niveau d'industrie le plus désagregé possible. Bien qu'étant impossible de quantifier la marge d'erreur des estimations du produit intérieur brut, il est toutefois possible de fournir une indication approximative et quelque peu subjective de la qualité de ces mêmes estimations. Le système d'évaluation qui suit provient par conséquent d'une opinion informée de la qualité générale relative des estimations du produit intérieur brut pour chaque industrie:

- 1 - très bon
- 2 - bon
- 3 - acceptable
- 4 - faible

(1) See appendix 2 for contents.

(1) Voir l'appendice 2 pour le contenu.

(2) The reader should note that for the petroleum refining industry the valuation of products shipped and the resultant value added calculations are highly subjective. Because of the high degree of vertical integration respondents have difficulty in defining a clear cut-off point between refining and marketing activities. Therefore, in many instances artificial transfer prices define establishment limits.

(2) Le lecteur doit tenir compte de la nature subjective des données sur la valeur des produits livrés par l'industrie de raffinage du pétrole et du calcul de la valeur ajoutée qui en découle. L'importante intégration verticale qui caractérise cette industrie rend parfois difficile une distinction claire et nette entre activités de raffinage et de commercialisation. Il fut donc nécessaire dans certains cas, de recourir à des prix de transferts artificiels pour en définir les limites.

Appendix II

Appendice II

CONTENTS OF INDUSTRY GROUPINGS

ACTIVITÉS ÉCONOMIQUES COMPRISES DANS CHAQUE AGRÉGAT

Industry groupings	SIC CAE	Agrégats des activités économiques
The industry content of these groupings is defined as follows:		Énumération des activités économiques contenues dans chaque agrégat ci-après:
Gross domestic product less agriculture: (all industries less agriculture)	2-11	Produit intérieur brut moins l'agriculture: (toutes les industries, moins l'agriculture)
Industrial production:		Production industrielle:
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Electric power, gas and water utilities	7 04	Énergie électrique, gaz et eau
Goods-producing industries:		Industries productrices de biens:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Electric power, gas and water utilities	7 04	Énergie électrique, gaz et eau
Service-producing industries:		Industries productrices de services:
Transportation, storage and communication	7 01-03	Transports, entreposage et communications
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Community, business and personal service industries	10	Services socio-culturels commerciaux et personnels
Public administration and defence	11	Administration publique et défense
Commercial industries:		Industries commerciales:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Transportation, communication and other utilities, less SIC 516, highway and bridge maintenance, 576-579, water systems and other utilities	7	Transports, communications et autres services publics, moins CAE 516, l'entretien de routes et de ponts, 576-579, distribution d'eau et autres services d'utilité publique
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurance et affaires immobilières
Health and welfare services less SIC 821, hospitals, and SIC 828, welfare organizations	10 02	Services médicaux et sociaux moins CAE 821, hôpitaux, et CAE 828, organismes de bien-être
Amusement and recreation services	10 04	Divertissements et loisirs
Services to business management	10 05	Services fournis aux entreprises
Personal services less SIC 873, private households	10 06	Services personnels moins CAE 873, ménages privés
Accommodation and food services	10 07	Hébergement et restauration
Miscellaneous services	10 08	Services divers

Contents of Industry Groupings – Continued

Activités économiques comprises dans chaque agrégat – suite

Industry groupings	SIC CAE	Agrégats des activités économiques
Commercial industries less agriculture: total commercial industries less agriculture		Industries commerciales sans l'agriculture: total des industries commerciales moins l'agriculture
Non-commercial industries:		Industries non commerciales:
Highway and bridge maintenance	516	Entretien de routes et de ponts
Water systems and other utilities	576-579	Distribution d'eau et autres services d'utilité publique
Education and related services	10 01	Enseignement et services connexes
Hospitals	821	Hôpitaux
Welfare organizations	828	Organismes de bien-être
Religious organizations	10 03	Organisations cultuelles
Private households	873	Ménages privés
Public administration and defence	11	Administration publique et défense
Durable manufacturing industries:		Industries manufacturières de biens durables:
Wood industries	5:08	Industrie du bois
Furniture and fixture industries	5:09	Industrie du meuble et des articles d'ameublement
Primary metals industries	5:13	Première transformation des métaux
Metal fabrication industries (except machinery and transportation equipment industries)	5:13	Fabrication de produits en métal (sauf machines et équipement de transport)
Machinery industries (except electrical machinery)	5:14	Fabrication de machines (sauf électriques)
Transportation equipment industries	5:15	Fabrication d'équipement de transport
Electrical products industries	5:16	Fabrication de produits électriques
Non-metallic mineral products industries	5:17	Fabrication de produits minéraux non-métalliques
Non-durable manufacturing industries:		Industries manufacturières de biens non durables:
Food and beverage industries	5:01	Industrie des aliments et boissons
Tobacco products industries	5:02	Industrie du tabac
Rubber and plastics products industries	5:03	Industrie du caoutchouc et des produits en matière plastique
Leather industries	5:04	Industrie du cuir
Textile industries	5:05	Industrie textile
Knitting mills	5:06	Bonneterie
Clothing industries	5:07	Industrie de l'habillement
Paper and allied industries	5:10	Industrie du papier et activités annexes
Printing, publishing and allied industries	5:11	Imprimerie, édition et activités annexes
Petroleum and coal products industries	5:18	Fabrication de produits du pétrole et du charbon
Chemical and chemical products industries	5:19	Industrie chimique
Miscellaneous manufacturing industries	5:20	Industries manufacturières diverses
Finance, insurance, real estate less royalties and imputed rent:		Finances, assurances et affaires immobilières sans les redevances et le loyer imputé:
Finance industries	9:01	Institutions financières
Insurance carriers	9:02	Assureurs
Insurance agencies and real estate industry	9:03	Agences d'assurances et affaires immobilières
Food manufacturers:		Fabricants d'aliments:
Meat and poultry products industry	101	Industries de la viande et de la volaille
Fish products industry	102	Industrie de la transformation du poisson
Fruit and vegetable processing industries	103	Préparation de fruits et de légumes
Dairy products industry	104	Industrie laitière
Flour and breakfast cereal products industry	105	Meunerie et fabrication de céréales de table
Feed industry	106	Fabrication d'aliments pour les animaux
Bakery products industries	107	Boulangerie et pâtisserie (fabrication)
Miscellaneous food industries	108	Industries alimentaires diverses

Contents of Industry Groupings – Concluded

Activités économiques comprises dans chaque agrégat – fin

Industry groupings	SIC CAE	Agrégats des activités économiques
Automotive products manufacturers:		Fabricants de produits de l'automobile:
Motor vehicle manufacturers	323	Fabricants de véhicules automobiles
Truck body and trailer manufacturers	324	Fabricants de carrosseries de camions et remorques
Motor vehicle parts and accessories manufacturers	325	Fabricants de pièces et accessoires d'automobiles
Commercial goods-producing industries:		Industries commerciales productrices de biens:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Electric power	572	Énergie électrique
Gas distribution	574	Distribution de gaz
Commercial goods-producing industries less agriculture: total goods-producing industries less agriculture		Industries commerciales productrices de biens sans l'agriculture: total des industries commerciales productrices de biens moins l'agriculture
Commercial service-producing industries:		Industries commerciales productrices de services:
Air transport	501	Transports aériens
Services incidental to air transport	502	Services auxiliaires des transports aériens
Railway transport	503	Transports ferroviaires
Water transport	504	Transports par eau
Services incidental to water transport	505	Services auxiliaires des transports par eau
Moving and storage, used goods, uncrated; other truck transport	506,507	Déménagement et entreposage de biens usagés; autre camionnage
Bus transport, interurban and rural	508	Transports interurbains et ruraux par autocar

Appendix IV

GLOSSARY OF MAIN TERMS

Gross Domestic Product at Factor Cost

The value of production arising within the geographical boundaries of Canada irrespective of whether the factors of production involved are resident or non-resident. The following table shows the relationship between gross national product at market prices and gross domestic product at market prices and at factor costs.

GNP at Market Prices	
Less: investment income received from non-residents	
Plus: investment income paid to non-residents	
= GDP at Market Prices	
Less: net indirect taxes	
Less: residual error of estimate	
= GDP at Factor Cost	

Indirect Taxes

Taxes assessed on producers in respect of the production, sale, purchase or use of goods and services, which they charge to the expenses of production. Also included are import duties and the operating surplus, reduced by the normal margin of profits of business units, of fiscal and similar monopolies of government.

Net Indirect Taxes

Indirect taxes less subsidies.

Subsidies

All grants on current account made by government to private industries and public corporations, and grants made by the public authorities to government enterprises in compensation for operating losses when these losses are clearly the consequence of the policy of the government to maintain prices at a level below costs of production.

Producers' Values

The value in the market of the gross output of commodities, industries, etc. at the establishment of the

Appendice IV

GLOSSAIRES DES PRINCIPAUX TERMES UTILISÉS

Produit intérieur brut au coût des facteurs

La valeur des biens et services produits à l'intérieur des frontières géographiques du Canada, que les facteurs de production soient résidents ou non. Le tableau suivant montre la relation entre le produit national brut aux prix du marché et le produit intérieur brut aux prix du marché et au coût des facteurs.

PNB aux prix du marché	
Moins: revenus de placement reçus des non-résidents	
Plus: revenus de placement versés aux non-résidents	
= PIB aux prix du marché	
moins: impôts indirects nets	
moins: erreur résiduelle d'estimation	
= PIB au coût des facteurs	

Impôts indirects

Impôts payés par les producteurs, figurant dans leur coût de production et basés sur la production, la vente, l'achat ou l'utilisation de biens ou de services. Ces impôts comprennent les droits et taxes sur importations ainsi que les excédents d'exploitation des monopoles fiscaux et autres monopoles publics diminués de la marge bénéficiaire normale.

Impôts indirects nets

Impôts indirects diminués des subventions d'exploitation.

Subvention d'exploitation

Tous les transferts courants de l'administration au secteur privé et aux sociétés publiques et les transferts des pouvoirs publics aux entreprises publiques pour compenser leurs pertes d'exploitation lorsque celles-ci sont manifestement la conséquence de la politique des pouvoirs publics visant à maintenir des prix à un niveau inférieur aux coûts de production.

Valeur départ-usine

Valeur aux prix du marché de la production brute à la sortie de l'établissement du producteur. La valeur départ-usine de la

producers; or the sum of the values of direct inputs, intermediate inputs at purchasers' values and indirect taxes less subsidies in respect of the commodities, industries, etc. The value added of industries at producers' values is equal to gross output of the industries at producers' values less the purchasers' values of the intermediate consumption in respect of the gross output.

Factor Cost True

In the case of gross output of commodities, industries, etc. the producers' values less the sum of the indirect taxes, net, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs into the production of the commodities, industries, etc.; or the accumulation of the primary inputs, that is, compensation of employees, consumption of fixed capital and operating surplus, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs. The value added of industries at true factor values is equal to the true factor value of their gross output less the true factor value of their intermediate inputs (consumption).

Factor Costs, Approximate

In the case of the gross output of commodities, industries, etc. producers' values less the indirect taxes, net, in respect of the commodities, industries, etc.; or the sum of the primary inputs and the purchasers' value of the intermediate inputs. In the case of the value added of industries, the gross output of the industries valued at approximate factor values less the purchasers' value of the intermediate inputs into the industries.

Domestic Territory

In addition to the territory lying within the political frontiers of a country, (i) ships and aircraft operated by residents of the country entirely, or primarily, between two or more countries; (ii) fishing vessels, oil and natural gas rigs, and floating platforms operated by residents of the country wholly, or mainly, in international waters or engaged in extraction in areas in which the country has the exclusive right of exploitation by virtue of international agreements or pronouncements; and (iii) the embassies, consulates and military establishments of the country located abroad.

Establishment

For purposes of economic production, the establishment as a statistical unit is defined as:

The smallest operating entity which produces as homogeneous a set of goods and services as possible and for which records provide data on the value of output together with the cost of materials used and cost and quantity of labour resources employed to produce the output, and for which records or estimated allocations can provide the full range of production account variables to calculate "value added".

production peut aussi être exprimée comme la somme des coûts des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation), des impôts indirects, nets des subventions d'exploitation, et de la consommation intermédiaire aux prix d'acquisition. La valeur départ-usine de la valeur ajoutée d'une branche est égale à la valeur départ-usine de la production de cette branche diminuée de la consommation intermédiaire de celle-ci aux prix d'acquisition.

Valeur exacte au coût des facteurs

La valeur exacte au coût des facteurs de la production brute est égale à la différence entre la valeur départ-usine de la production et la somme des impôts indirects — nets des subventions d'exploitation — relatifs à la production et à la consommation intermédiaire directe et indirecte. On peut aussi l'exprimer comme la somme des coûts des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) incorporés dans la valeur du produit: c'est-à-dire la somme des coûts des facteurs utilisés dans la production des entrées intermédiaires directes et indirectes et des coûts des facteurs utilisés dans la production du produit. La valeur exacte au coût des facteurs de la valeur ajoutée est égale à la différence entre les valeurs exactes au coût des facteurs de la production et de la consommation intermédiaire.

Valeur approchée au coût des facteurs

La valeur approchée au coût des facteurs de la production est égale à la valeur de cette production aux prix départ-usine diminuée des impôts indirects — nets des subventions d'exploitation — frappant cette production. On peut encore exprimer la valeur approchée au coût des facteurs de la production comme la somme des coûts des facteurs (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) et de la consommation intermédiaire aux prix d'acquisition. La valeur approchée au coût des facteurs de la valeur ajoutée d'une branche est égale à la valeur approchée au coût des facteurs de la production de cette branche moins la consommation intermédiaire aux prix d'acquisition.

Territoire économique

Outre le territoire délimité par les frontières politiques d'un pays, le territoire économique comprend: (i) les navires et les avions entièrement ou essentiellement exploités par des résidents d'un pays entre deux ou plusieurs pays, (ii) les bateaux de pêche, les derricks pour l'extraction du pétrole et du gaz naturel et les plates-formes flottantes exploitées entièrement ou essentiellement par des résidents d'un pays dans les eaux internationales ou exploitées dans des zones où le dit pays possède un droit exclusif d'exploitation en vertu d'accords ou de décisions internationaux et (iii) les ambassades, les consulats et les établissements militaires du pays à l'étranger.

Établissement

Comme outil servant à mesurer la production économique, l'établissement, en tant qu'unité statistique, est défini comme:

La plus petite entité opérationnelle dont la production de biens et services est aussi homogène que possible et pour laquelle les données sont disponibles sur la valeur de sa production, le coût des matériaux utilisés et le coût et la quantité de main-d'œuvre utilisée dans la production; les données doivent aussi être disponibles ou l'allocation par estimation rendue possible pour le reste de la gamme complète des variables du compte de production qui servent au calcul de la "valeur ajoutée".

Producers

All resident establishments and similar units, public as well as private, which produce goods and services for sale at a price which is normally intended to cover their cost of production; government units engaged in selling goods and services to the public which are characteristically commodities though as a matter of policy, the prices set for the items do not approximate the costs of production; activities such as government establishments, owner-occupied dwellings, which produce similar goods or services and use similar processes and resources as the typical industries though they do not produce for the market; resident units which both acquire financial assets and incur liabilities in the market; and bodies which mainly furnish social and community services free of charge, or at sales prices which are not intended to cover fully the costs of producing the services, and which are not entirely, or mainly, financed and controlled by the public authorities and all departments, establishments and other bodies of federal, provincial and local governments which engage in such activities as administration, defence, health, educational and social services, and promotion of economic growth whether accounted for, or financed in ordinary or extraordinary budgets or extra-budgetary funds. Includes social security schemes in respect of large sections of the community imposed, controlled or financed by government, non-profit institutions entirely, or mainly financed and controlled by general government or mainly serving general government, and embassies, consulates and military establishments of a country located abroad.

Commodities

Goods and services normally intended for sale on the market at a price that is designed to cover their cost of production. Includes all goods and services produced by industries, all imported goods and services as well as goods and services which are not normally sold in the market at a price intended to cover their cost of production. These items consist of most of the gross output of producers of government services and non-profit services to households, the domestic services rendered by one household to another.

Gross Output of Industries

In general, the value in the market of all the goods and services (commodities) produced during a period of account, including work-in-progress and products for use on own account. Valuation is usually at producers' values, that is the market value at the establishment of the producer, or at approximate basic values, that is producers' values less the relevant commodity taxes, net; the insurance service charge in the case of casualty and life insurance; and the sum of the actual and imputed service charges in the case of banks and similar financial institutions. The gross output of the producers of government services and private non-profit services to households is equivalent to the purchasers' values of the intermediate consumption, compensation of employees,

Producteurs

Tous les établissements résidents et les unités du même type, publics ou privés, qui produisent des biens et services pour la vente, à un prix destiné normalement à couvrir leur coût de production; les unités des administrations publiques vendant à la population des biens et des services qui sont manifestement des biens et services marchands, bien que, pour des raisons de politique générale, leur prix de vente n'atteigne pas leur coût de production; les activités telles que les entreprises publiques et les logements occupés par leurs propriétaires qui, bien qu'elles ne produisent pas pour le marché, fournissent des produits analogues à ceux des branches d'activité marchande et mettent en oeuvre des procédés et des moyens de production du même type que ceux des dites branches; les unités résidentes qui empruntent sur le marché et acquièrent des actifs financiers; les organismes qui, principalement, fournissent aux ménages des services sociaux et des services collectifs soit gratuitement, soit moyennant un prix de vente qui n'est pas destiné à couvrir entièrement le coût de production de ces services, et qui ne sont pas entièrement ou principalement financés et contrôlés par les pouvoirs publics et l'ensemble des ministères, des organismes et des autres services de l'administration (centrale ou locale) qui s'occupent de l'administration de la défense, de la santé, de l'enseignement et des services sociaux, de la promotion de la croissance économique, qu'ils soient couverts ou financés par des budgets ordinaires ou extraordinaires, ou par des fonds extra-budgétaires. Cet agent comprend les régimes de sécurité sociale destinés à de grands groupes de la collectivité qui sont imposés, contrôlés ou financés par les pouvoirs publics, les institutions sans but lucratif financées entièrement ou à titre principal par les administrations publiques ou contrôlées par elles et celles qui fournissent principalement des services à ces administrations ainsi que les ambassades, les consulats et les établissements militaires d'un pays situés à l'extérieur.

Biens et services marchands

Biens et services destinés normalement à être vendus sur le marché à un prix calculé pour couvrir leur coût de production. Sont marchands tous les biens et services produits par les branches d'activité marchande, tous les biens et services importés, ainsi que les biens et services qui ne sont pas normalement vendus sur le marché à un prix destiné à couvrir leur coût de production. Ces biens et services comprennent la plus grande partie de la production des branches non marchandes des administrations publiques et des institutions sans but lucratif au service des ménages, c'est-à-dire les services domestiques des ménages.

Production des branches d'activité marchande

D'une manière générale, on définit la production des branches d'activité marchande comme la valeur sur le marché de tous les biens et services (marchands), achevés ou en cours, qu'elles ont produits, pour la vente ou pour leur propre compte, au cours d'une période comptable. On calcule généralement la valeur de la production aux prix départ-usine et la valeur de base approchée de la production. La valeur de la production aux prix départ-usine est sa valeur sur le marché à la sortie de l'établissement producteur. La valeur de base approchée de la production est égale à la valeur départ-usine diminuée des taxes — nettes des subventions d'exploitation — affectées aux produits. La production des services d'assurance-dommages et d'assurance-vie est définie par la rémunération des services d'assurances. La production des banques et des institutions financières analogues

consumption of fixed capital of these producers. The gross output of domestic services rendered by households consists of the compensation of employees only.

Intermediate Input of Industries

Goods and services (commodities) used in production, including repair and maintenance of the capital stock, research, development and prospecting, indirect outlays on financing capital formation, such as floatation costs for loans, and transfer costs involved in purchases and sales of land, intangible assets and financial claims.

Intermediate Input of Producers of Government Services

Acquisitions (purchases and transfers in kind) of new goods and services (mainly commodities) on current account, less net sales of similar second-hand goods and scraps and wastes therefrom, including durable goods acquired primarily for military purposes.

Intermediate Input of Producers of Private Non-Profit Services to Households

Acquisitions (purchases and transfers in kind) of new goods and services (commodities) less net sales of similar second-hand goods and scraps and wastes therefrom. Excluded are second-hand goods received for distribution to households without renovation or alteration.

Operating Surplus

Gross output at producers' values less the sum of intermediate consumption, compensation of employees, consumption of fixed capital and indirect taxes reduced by subsidies.

Factor Incomes

Compensation of employees by, and net operating surplus of, producers. The net domestic product is often valued at factor incomes.

Labour Income

All compensation (wages, salaries, supplementary labour income) earned by employees residing in Canada or employed abroad by the Federal Government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers.

est égale à la somme des rémunérations, effectives ou imputées, des services bancaires. La production des branches non marchandes des administrations publiques et des institutions privées sans but lucratif est égale à la valeur départ-usine de la consommation intermédiaire, de la rémunération des employés et de la consommation de capital fixe de ces producteurs. La production brute des services domestiques des ménages comprend seulement la rémunération des employés.

Entrées intermédiaires des branches d'activités marchandes

Biens et services marchands consommés dans la production, y compris la réparation et l'entretien courant du stock de capital, la recherche, le développement et la prospection, les dépenses indirectes pour le financement de la formation de capital telles que les frais d'émission des emprunts et les frais de mutation encourus lors de l'achat et de la vente de créances.

Entrées intermédiaires des branches non marchandes des administrations publiques

Acquisitions (achats et transferts en nature) de biens neufs et de services (principalement des biens et services marchands) en compte courant, y compris les biens durables acquis principalement à des fins militaires, diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts et de déchets.

Entrées intermédiaires des branches non marchandes des institutions privées sans but lucratif au service des ménages

Acquisitions (achats et transferts en nature) de biens neufs non durables et de services (biens et services marchands) diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts ou de déchets. Les biens d'occasion reçus pour être distribués gratuitement aux ménages, sans remise à neuf ni transformation, ne sont pas compris dans les ventes nettes de biens d'occasion.

Excédent net d'exploitation

Différence entre la production aux prix départ-usine et la somme de la consommation intermédiaire, de la rémunération des salariés, de la consommation de capital fixe et des impôts indirects diminués des subventions d'exploitation.

Revenus des facteurs

Rémunération des salariés par les producteurs et excédent net d'exploitation de ces derniers. Le produit intérieur net est souvent évalué aux revenus des facteurs.

Revenu du travail

La rémunération totale (salaires, traitements, revenu supplémentaire du travail) versée aux salariés demeurant au Canada ou aux personnes employées à l'étranger par l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les agriculteurs ne font pas partie du revenu du travail.

Supplementary Labour Income

Payments made by employers for the future benefit of their employees, comprising employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

Royalty

Payment for concessions, the use of patented or copyrighted materials, and similar rights; treated as income from property.

Accrual Basis

The item, for example, outlay, income, obligation, other flow, is recorded as of the time at which it is incurred or earned.

Cash Basis

The item, for example, outlay, income, other receipt, is recorded as of the time at which the payment is actually made or received.

Current Repairs and Maintenance

Outlays for repairs to fixed assets. Includes outlays on new parts and attachments of fixed assets which have an expected life of use of one year or somewhat more but which are short-lived relative to the fixed asset itself, or are of relatively small value. Major alterations in, or additions to, machinery, equipment, structures or other fixed assets which significantly extend their expected life-time of use, productivity, or the character or volume of the services they render, are considered capital acquisitions.

Final Use of Goods and Services

The disposition of goods and services to final consumption expenditure, gross fixed capital formation, increases in stocks and exports.

Revenu supplémentaire du travail

Paielements effectués par l'employeur dans l'intérêt futur de ses salariés, c'est-à-dire les cotisations de l'employeur aux régimes de prévoyance et aux caisses de retraite, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

Redevances, revenus des actifs incorporels r.d.a.

Droits de concession, paiement pour l'utilisation de brevets, droits d'auteur, etc. Ces redevances sont traitées comme un revenu de la propriété.

Comptabilité d'exercice

La grandeur considérée, qu'il s'agisse d'une dépense, d'un revenu, de l'obligation d'un paiement ou de tout autre flux, est enregistrée au moment où elle est engagée (dans le cas d'une dépense) ou gagnée (dans le cas d'une recette).

Comptabilité de caisse

La grandeur considérée: dépense, revenu, autre recette, est enregistrée au moment du paiement ou de la recette même.

Entretien courant

Dépenses pour les réparations des actifs fixes. Les achats de pièces et d'accessoires dont la valeur est relativement faible ou dont la durée de vie est d'un an ou légèrement supérieure à un an, mais de toute façon inférieure à celle de l'équipement principal, sont inclus dans les dépenses d'entretien courant. Modifications ou additions importantes apportées aux machines, au matériel, aux constructions et aux autres actifs fixes qui en augmentent notablement la durée d'utilisation ou la productivité, modifient la nature des services qu'ils rendent ou en accroissent le volume.

Emplois finals de biens et services

Consommation finale, formation brute de capital fixe, variation des stocks et exportation.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Industry Measures Section,
Industry Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0579) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Zenith 2-2015

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des mesures industrielles,
Division du produit industriel,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0579) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(949-4020)
Halifax	(426-5331)	Regina	(359-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(992-4734)	Vancouver	(666-3691)
Toronto	(966-6586)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

A Note on CANSIM®

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The last pages contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve constant price Gross Domestic Product, monthly, without seasonal adjustment, you must use "D 144336".

For further information write to **CANSIM** Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note au sujet de CANSIM®

Les données figurant dans cette publication ont été extraites de **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les dernières pages renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries de **CANSIM**. Ainsi, pour extraire le produit intérieur brut en prix constants mensuel avant désaisonnalisation, il suffit d'utiliser "D 144336".

Pour plus de renseignements, écrivez à la Division de **CANSIM** Division, Statistique Canada, Ottawa, K1A 0Z8, ou téléphoner à (613) 995-7406.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 61 provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and estimates of Gross Domestic Product by industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods. Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, no 2, rév. 3 Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Gross Domestic Product and its components may be obtained from the following Statistics Canada publications:

Catalogue 61-213. *Gross Domestic Product by Industry*, 1981 issue, for the 1971-1981 period.

Catalogue 61-005. *Gross Domestic Product by Industry*, the September 1982 issue and current issues for the reference period beginning January 1982.

The same data are available in the following **CANSIM** matrices:

	Matrix numbers
Gross Domestic Product:	
Monthly	1131
Quarterly	1130
Annual	1125-1129

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in **CANSIM** matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Gross Domestic Product and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry — (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961=100, Catalogue 61-516, for the period from 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following **CANSIM** matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur brut et de ses composantes sur la base 1971 = 100 à partir de 1971:

N° 61-213 au catalogue. *Produit intérieur brut par industrie*, publication de 1981 consacrée à la période 1971-1981.

N° 61-005 au catalogue. *Produit intérieur brut par industrie*, l'édition de septembre 1982 et les publications courantes présentent des données pour la période de référence commençant en janvier 1982.

On peut obtenir les mêmes données des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur brut:	
Mensuel	1131
Trimestriel	1130
Annuel	1125-1129

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de **CANSIM** ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur brut et les composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry — (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur réel:	
Annuel	383
Trimestriel	15
Mensuel	1421
Indice de la production industrielle:	
Annuel	384
Mensuel	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-502. See this publication for description of concepts, sources and methods for the Index of Industrial Production.

Catalogue 61-505. See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of Origin.

Catalogue 61-506. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

Catalogue 61-510. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept.

Catalogue 61-516. See this publication for technical note concerning the introduction of annual estimates of Real Domestic Product by industry expressed in dollars, the incorporation of the results of the 1971 census of merchandising and services for a large number of the service-producing industries, the introduction of annual estimates of gross output, intermediate input, and value added in current and constant (1961) prices and the corresponding implicit price indexes for selected manufacturing industries and the adoption of the final 1961 weighting system.

Catalogue 61-213. See the 1971-1974 issue for the technical note concerning the implementation of a 1971 weight and reference base and the adoption of the 1970 Standard Industrial Classification. See this issue concerning revisions to the 1971 (base year) Gross Domestic Product distribution and the introduction of annual estimates of gross output, intermediate inputs and value added in current year prices and in constant (1971) prices for all industries. See Appendix 1 for 1) a complete distribution of Gross Domestic Product, 2) the types of indicators used and 3) a quality assessment for both published and unpublished industry estimates. See Appendix 2 for the content of the "Industry Groupings" and Appendix 3 for the content of the "Groupings of Industries by Demand Category".

Catalogue 61-202. See this publication for estimates and methodological summaries of current and constant (1971) price provincial Gross Domestic Product for selected industries.

CONCEPTS, SOURCES ET MÉTHODES

N° 61-502 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

N° 61-505 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

N° 61-506 au catalogue. Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

N° 61-510F au catalogue. Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entraîné l'introduction du concept "d'activité totale".

N° 61-516 au catalogue. Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

N° 61-213 au catalogue. Se rapporter à la note technique de la livraison de 1971-1974 concernant l'introduction des bases de référence et de pondération de 1971 et l'adoption de la Classification des Activités Économiques de 1970. Se rapporter à cette livraison concernant les révisions à la distribution du produit intérieur brut de 1971 (année de référence) et l'introduction des estimations de la production brute, la consommation intermédiaire et la valeur ajoutée en prix de l'année courante et en prix constants de 1971 pour toutes les industries. Se rapporter à l'appendice 1 pour 1) une distribution détaillée du produit intérieur brut, 2) les types de projecteurs et 3) une évaluation qualitative-concernant les estimations publiées et non publiées par industrie. Se rapporter à l'appendice 2 pour les listes d'industries comprises dans chaque agrégat d'activités économiques et, à l'appendice 3, pour celles comprises dans chaque groupe d'activités économiques par type de demande.

N° 61-202 au catalogue. Se rapporter à cette publication, qui contient les sommaires des méthodes et les estimations provinciales du produit intérieur brut en prix courants et en prix constants de 1971 pour certaines industries.

TECHNICAL NOTE(1)

This issue of the publication "Gross Domestic Product by Industry" presents annual estimates in current and constant (1971) prices for the total economy by industry, and monthly and quarterly estimates of gross domestic product at factor cost in constant (1971) prices. Quarterly and monthly data are presented in both seasonally adjusted and unadjusted form.

To assist users in analysis of the data, special aggregations of gross domestic product by demand category have been prepared. Each industry's total gross domestic product has been assigned to a demand or use category according to the major use or disposition of its production (see Appendix III for a listing of the contents of each demand category).

Revisions to previously published data are due to the incorporation of statistical revisions to data series underlying the estimates, the introduction of some methodological changes, and in the case of the monthly and quarterly measures, the incorporation of revised seasonal factors.

The gross domestic product (GDP) estimates in this publication are based on the establishment as the statistical unit. The use of the establishment as the basic unit usually results in a different industrial distribution from that contained in Table 28 of the National Income and Expenditure Accounts (catalogue 13-201). The estimates in that table have been prepared by summing labour income and inventory valuation adjustments — based on the establishment — and data for investment income and for capital consumption allowances collected and tabulated using the company or enterprise as the basic statistical unit.

In preparing estimates of an industry's production, all activities of establishments classified to the industry are included, that is, the "total activity" concept is used. Thus if an establishment classified to manufacturing also transports and sells its own goods at the wholesale level, these secondary activities will be included in the establishment's production and therefore in the manufacturing industry. Furthermore, the industry includes establishments classified to all sectors of the economy — government, business and personal.

In addition to GDP estimates, gross output and intermediate input estimates have been prepared by industry. At the industry level the gross output and intermediate input estimates are the sum of the individual establishments. No attempt has been made to eliminate transactions between establishments within the same industry, that is, to derive "net sector" estimates.

(1) See Appendix IV for a glossary of the main terms.

NOTE TECHNIQUE(1)

Ce numéro de la publication "Produit intérieur brut par industrie" contient des estimations annuelles par industrie (branche d'activité) en prix courants et constants (1971) pour l'ensemble de l'économie, et des estimations mensuelles et trimestrielles du produit intérieur brut au coût des facteurs en prix constants (1971). Les données trimestrielles et mensuelles sont publiées sous forme désaisonnalisée et non désaisonnalisée.

Afin d'aider les utilisateurs dans l'analyse des données, on a élaboré des agrégats spéciaux du produit intérieur brut par catégorie de demande. Le produit intérieur brut total de chaque branche d'activité a été affecté à une catégorie de demande selon la principale utilisation de sa production (voir l'appendice III pour une liste du contenu de chaque catégorie de demande).

Les révisions apportées aux données publiées par le passé sont dues aux révisions statistiques des séries qui servent de base aux estimations, à certaines modifications méthodologiques, et, dans le cas des mesures mensuelles et trimestrielles, à l'utilisation de coefficients saisonniers révisés.

L'établissement constitue l'unité statistique qui sert de base aux estimations du produit intérieur brut (PIB) présentées ici. L'utilisation de l'établissement comme unité de base se traduit généralement par une répartition par branche d'activité différente de celle qui est présentée au tableau 28 des comptes nationaux des revenus et des dépenses (n° 13-201 au catalogue). On a obtenu ces estimations en additionnant le revenu du travail et les ajustements de valeur des stocks selon l'établissement et les données qui ont été recueillies et totalisées sur les revenus de placement et les déductions pour amortissement, et qui ont la compagnie ou l'entreprise comme unité statistique de base.

Pour l'estimation de la production d'une branche d'activité, on prend en considération toutes les activités des établissements qui ont été classées à cette branche d'activité, c'est-à-dire qu'on se base sur le concept d'"ensemble des activités". Ainsi, si un établissement qui a été classé au secteur manufacturier transporte et vend en gros ses propres produits, ces activités secondaires feront partie de la production de l'établissement et, par conséquent, de celle du secteur manufacturier. En outre, la branche d'activité comprend des établissements classés à tous les secteurs de l'économie, qu'il s'agisse d'administrations publiques, d'entreprises ou de particuliers.

En plus des estimations du PIB, on a préparé des estimations de la production brute et des entrées intermédiaires par branche d'activité. On obtient ces estimations en prenant la somme de ces données pour les différents établissements. On n'a pas éliminé les transactions entre les établissements au sein d'une même branche d'activité, en d'autres termes, on n'a pas essayé d'obtenir d'estimations nettes pour le secteur.

(1) Voir l'appendice IV pour un glossaire des principaux termes utilisés.

The current price estimates of GDP at factor cost (or value added) by industry can be measured directly by summing the factor incomes and depreciation or indirectly by deducting the cost of the intermediate goods and services used in the production process from the value of gross production or output. The method adopted for any particular industry is determined by the availability of data. If possible, estimates based on both methods have been prepared and discrepancies have been resolved.

Gross output is frequently estimated as the sum of sales and inventory change for finished goods and work-in-progress. Because the System of National Accounts uses an accrual method of valuation, typically the reported value of inventory change must be adjusted by the amount of the change which can be attributed to changes in prices (this is called the "inventory valuation adjustment"). The revalued inventory change is called "the value of the physical change" in inventories. Similarly, intermediate inputs must be adjusted to take account of the extent to which raw materials used in production during the current period were purchased in a previous period.

For any industry, gross output can be described as the total of all costs, intermediate and factor. In some cases, particularly for the non-commercial industries, data on gross output are not available and must be estimated indirectly as the sum of total costs. In many of these industries, data on intermediate inputs are not available on an establishment basis so that GDP has been used as a proxy for gross output. It should be noted that for trade, the gross output is the total value of sales, rather than the gross margin⁽²⁾. This applies also to secondary trading activity in other industries.

Constant price series represent the revaluation of quantities of production using prices of a base period. In principle constant price data should be derived by deflating current price data by a currently weighted (Paasche) price index to yield a base-weighted (Laspeyres) quantum series. In practice true Paasche price indexes do not exist so this procedure is approximated by using Laspeyres price indexes to deflate the values of commodities (goods or services) produced or used at the lowest level of commodity detail possible. Constant dollar data for individual commodities may also be derived by multiplying current period quantities of production by their price in the base year. The constant dollar data for gross output or intermediate inputs is the sum of the values for the individual commodities.

The constant price series for GDP is derived as the difference between gross output and intermediate inputs in constant prices. This technique is called "double deflation".

On peut estimer le PIB en prix courants, au coût des facteurs (ou valeur ajoutée) par branche d'activité de façon directe en additionnant les revenus des facteurs et l'amortissement ou, de façon indirecte, en déduisant de la valeur de la production brute le coût des biens et services intermédiaires qui ont été utilisés au cours de la production. Le choix de la méthode pour une branche déterminée dépend de l'existence des données. Dans la mesure du possible, on a effectué des estimations selon les deux méthodes et on a réconcilié les divergences.

On estime souvent la production brute à l'aide de la somme des ventes et des variations des stocks pour les produits finis et les produits en cours. Comme le système de comptabilité nationale se base sur une méthode de comptabilité d'exercice, il arrive souvent que la valeur déclarée de la variation des stocks doive être ajustée par la partie de la variation imputable à la variation des prix. C'est ce qu'on appelle "l'ajustement de la valeur des stocks". La variation réévaluée correspond à la "valeur de la variation matérielle" des stocks. De même, les entrées intermédiaires doivent être ajustées afin de tenir compte des matières premières qui ont été utilisées dans la production au cours de la période courante mais qui ont été achetées durant une autre période.

On peut représenter la production brute de toute branche d'activité comme le total de ses coûts, qu'il s'agisse d'entrées intermédiaires ou de facteurs de production. Dans certains cas, particulièrement pour les branches d'activité non commerciales, il n'existe pas de données sur la production brute et il faut estimer celle-ci indirectement à partir de la somme des coûts totaux. Dans un grand nombre de ces branches d'activité, nous ne disposons pas de données sur les entrées intermédiaires pour l'établissement et il faut se servir du PIB à la place de la production brute. À noter que, dans le commerce, la production brute correspond à la valeur totale des ventes plutôt qu'à la marge brute⁽²⁾. C'est également le cas des activités commerciales secondaires dans les autres branches d'activité.

Les séries en prix constants résultent d'une réévaluation des quantités produites à l'aide des prix d'une période de base. Pour calculer ces séries, on doit en principe procéder à la déflation des données en prix courants à l'aide d'un indice des prix à pondération courante (indice de Paasche) afin d'obtenir une série de quantité pondérée en fonction de l'année de base (indice de Laspeyres). En pratique, il n'existe pas de vrais indices de Paasche et on se contente d'utiliser des indices de Laspeyres pour corriger de leur variations de prix les valeurs des biens ou services (produits ou utilisés) au plus bas niveau de détail possible. On peut également obtenir des données en dollars constants pour des marchandises déterminées en multipliant les quantités produites durant la période courante par leur prix durant l'année de base. Pour obtenir la production brute ou les entrées intermédiaires en dollars constants, on calcule la somme des valeurs pour les différentes marchandises.

On obtient les séries en prix constants du PIB en calculant la différence entre la production brute et les entrées intermédiaires en prix constants. C'est ce qu'on appelle la "double déflation".

(2) Gross margin is defined as sales less cost of goods sold.

(2) La marge brute est définie comme la valeur des ventes moins le coût des biens vendus.

For some industries, data limitations do not permit the use of the double deflation technique. In these cases, the constant price estimates of GDP may be based on the movement of gross output or intermediate inputs by assuming a fixed relationship between gross output and intermediate inputs. In other cases, labour input may be used as a projector of output — sometimes with an estimated productivity change. Other related projectors may also be used. Appendix I contains a listing of the types of indicators used in the preparation of constant price estimates.

For the monthly measures, it is generally true that there are many fewer data available to prepare the estimates and these data are usually not as reliable as the annual data. In only a few cases are data available to permit the preparation of gross output and intermediate input estimates. The monthly data usually do not include secondary activities and they may not cover all establishments in the industry or all commodities produced by the industry.

The relationship between annual and monthly measures in the period for which both are available is used to estimate necessary adjustments to the monthly data in the current period. At the end of the current calendar year a preliminary review of the monthly estimates is undertaken and they may be revised in the light of other related data.

The monthly data are also adjusted by a factor that reflects variations in the number of "trading days" within each month to derive the seasonally unadjusted data and by a seasonal adjustment factor to derive the seasonally adjusted data. The seasonal adjustment factors are derived using the "X-11 Arima"(3) method. Any trading day adjustments generated by this program are based not only on the number of days in the month but also on the relative importance of each day of the week.

(3) A variant developed by Statistics Canada on the "X-11" method originally developed by the U.S. Bureau of the Census.

Dans certaines branches d'activité, les limites des données ne permettent pas d'utiliser la technique de la double déflation. Dans ce cas, on peut faire reposer les estimations du PIB en prix constants sur les variations de la production brute ou des entrées intermédiaires si l'on suppose une relation fixe entre la première et les dernières. Dans d'autres cas, on peut se servir des entrées de main-d'œuvre et même faire varier leur productivité pour projeter la production. Il existe également d'autres bases de projection. L'appendice I contient une liste des types d'indicateurs qui servent à la préparation des estimations en prix constants.

Pour les mesures mensuelles, il est vrai qu'il y a généralement beaucoup moins de données sur lesquelles fonder les estimations. En outre, ces données sont habituellement moins fiables que les données annuelles. Ce n'est que rarement que les données permettent l'estimation de la production brute et des entrées intermédiaires. En règle générale, les données mensuelles ne portent pas sur les activités secondaires et il arrive qu'elles ne comprennent pas tous les établissements d'une branche d'activité ou tous les produits fabriqués par une branche d'activité.

Pour estimer les ajustements qu'il faut apporter aux données mensuelles de la période courante, on se fonde sur la relation entre les mesures annuelles et mensuelles au cours des périodes pour lesquelles on dispose des deux types de données. À la fin de l'année civile courante, on entreprend un examen préliminaire des estimations mensuelles et on procède éventuellement à leur révision à l'aide d'autres données.

Les données mensuelles pour la série non désaisonnalisée sont corrigées à l'aide d'un facteur qui traduit les variations dans le nombre de "jours commerciaux" pour chaque mois tandis que les données pour la série désaisonnalisée le sont au moyen d'un coefficient de désaisonnalisation. Les coefficients de désaisonnalisation sont obtenus grâce à la méthode "X-11-ARMMI"(3). Les corrections se rapportant aux jours commerciaux sont fondées sur le nombre de jours dans le mois et sur l'importance relative de chaque jour de la semaine.

(3) Une variante élaborée par Statistique Canada à partir de la méthode "X-11" mise au point par le U.S. Bureau of the Census.

REVISIONS TO GROSS DOMESTIC PRODUCT IN CONSTANT (1971) PRICES

The revisions to GDP apply to the period 1978 to 1981.

Annual measures of GDP have been calculated for an additional year, revisions to source data have been incorporated and methodology has been changed for some industries.

The monthly data have been revised due to the incorporation of the latest annual levels, revisions to the monthly data on which the output measures are based, changes in the methodology for several industries and revisions to the seasonal factors.

The revisions to year-to-year movements in certain aggregates are included in the following table.

RÉVISIONS DU PRODUIT INTÉRIEUR BRUT EN PRIX CONSTANTS DE 1971

Les révisions au PIB concernent la période allant de 1978 à 1981.

On a calculé les chiffres annuels du PIB pour une année supplémentaire, puis incorporé des révisions aux données de référence et changé la méthodologie pour un certain nombre d'activités économiques.

Les données mensuelles ont été révisées en vue de prendre en compte l'incorporation des niveaux annuels les plus récents, les modifications apportées aux données mensuelles servant au calcul de production, les changements méthodologiques pour plusieurs branches d'activité et les révisions des facteurs saisonniers.

Le tableau suivant présente les révisions apportées aux variations annuelles de certains agrégats.

Revisions to Year-to-year Percentage Change in Gross Domestic Product and Major Aggregates
(constant 1971 prices)

Révisions aux variations annuelles en pourcentage du produit intérieur brut et des principaux agrégats
(en prix constant de 1971)

Appendix I

DESCRIPTION OF GROSS DOMESTIC PRODUCT BY INDUSTRY

This appendix shows the 1971 Gross Domestic Product distribution, the types of indicators used, an assessment of the quality of the measures and the publication level and pattern for annual and monthly data. Quarterly data are calculated from the monthly data.

The **types of indicators** used are shown at the most detailed industry working level. A bracket indicates that the annual estimates are based on the monthly projector. A blank in the monthly indicator column denotes that no estimate is prepared at that level. The following symbols have been used for the various indicators:

- N - Value Added
- G - Gross Output
- I - Intermediate Input
- L - Labour Input
- LD - Labour and Depreciation
- O - Other
- ... - Not Applicable

The appendix also provides an **assessment of the quality of the estimates** of Gross Domestic Product at the most detailed industry working level. While it is not possible to quantify the margin of error in the estimates of Gross Domestic Product it is possible to provide a somewhat subjective indication of the quality. The following rating system is therefore offered by way of an informed opinion of the relative over-all quality of the estimates of Gross Domestic Product for each industry:

- 1 - Very Good
- 2 - Good
- 3 - Acceptable
- 4 - Poor

Appendice I

DESCRIPTION DU PRODUIT INTÉRIEUR BRUT PAR INDUSTRIE

Cet appendice présente la distribution du produit intérieur brut pour 1971, les types de projecteurs utilisés, une évaluation de la qualité des mesures et une liste des données annuelles et mensuelles publiées. Les données trimestrielles sont calculées à partir des données mensuelles.

Les **types de projecteurs** utilisés sont présentés au niveau de calcul d'industrie le plus désagrégré possible. Une parenthèse indique que les estimations annuelles sont compilées à partir du projecteur mensuel. Un espace blanc dans la colonne du projecteur mensuel signifie qu'aucune estimation n'est faite à ce niveau. Les symboles suivants sont utilisés pour les projecteurs:

- N - valeur ajoutée
- B - production brute
- I - consommation intermédiaire
- T - travail
- TD - travail et dépréciation
- A - autres
- ... - n'ayant pas lieu de figurer

L'appendice présente également une **évaluation qualitative** des estimations du produit intérieur brut calculées au niveau d'industrie le plus désagrégré possible. Bien qu'étant impossible de quantifier la marge d'erreur des estimations du produit intérieur brut, il est toutefois possible de fournir une indication approximative et quelque peu subjective de la qualité de ces mêmes estimations. Le système d'évaluation qui suit provient par conséquent d'une opinion informée de la qualité générale relative des estimations du produit intérieur brut pour chaque industrie:

- 1 - très bon
- 2 - bon
- 3 - acceptable
- 4 - faible

¹⁾ See appendix 2 for contents

¹⁾ Voir l'appendice 2 pour le contenu.

²⁾ The reader should note that for the petroleum refining industry the valuation of products shipped and the resultant value added calculations are highly subjective. Because of the high degree of vertical integration, respondents have difficulty in defining a clear cut-off point between refining and marketing activities. Therefore, in many instances, artificial transfer prices define establishment limits

²⁾ Le lecteur doit tenir compte de la nature subjective des données sur la valeur des produits livrés par l'industrie de raffinage du pétrole et du calcul de la valeur ajoutée qui en découle. L'importante intégration verticale qui caractérise cette industrie rend parfois difficile une distinction claire et nette entre activités de raffinage et de commercialisation. Il fut donc nécessaire, dans certains cas, de recourir à des prix de transferts artificiels pour en définir les limites

Appendix II

CONTENTS OF INDUSTRY GROUPINGS

ACTIVITÉS ÉCONOMIQUES COMPRISES DANS CHAQUE AGRÉGAT

Industry groupings	SIC CAE	Agrégats des activités économiques
The industry content of these groupings is defined as follows:		
Énumération des activités économiques contenues dans chaque agrégat ci-après:		
Gross domestic product less agriculture: all industries less agriculture	2-11	Produit intérieur brut moins l'agriculture: toutes les industries, moins l'agriculture
Industrial production:		Production industrielle:
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Electric power, gas and water utilities	7:04	Énergie électrique, gaz et eau
Goods-producing industries:		Industries productrices de biens:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Electric power, gas and water utilities	7:04	Énergie électrique, gaz et eau
Service-producing industries:		Industries productrices de services:
Transportation, storage and communication	7:01-03	Transports, entreposage et communications
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Community, business and personal service industries	10	Services socio-culturels, commerciaux et personnels
Public administration and defence	11	Administration publique et défense
Commercial industries:		Industries commerciales:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Transportation, communication and other utilities, less SIC 516, highway and bridge maintenance, 576-579, water systems and other utilities	7	Transports, communications et autres services publics, moins CAÉ 516, l'entretien de routes et de ponts, 576-579, distribution d'eau et autres services d'utilité publique
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Health and welfare services less SIC 821, hospitals, and SIC 828, welfare organizations	10:02	Services médicaux et sociaux moins CAÉ 821, hôpitaux, et CAÉ 828, organismes de bien-être
Amusement and recreation services	10:04	Divertissements et loisirs
Services to business management	10:05	Services fournis aux entreprises
Personal services less SIC 873, private households	10:06	Services personnels moins CAÉ 873, ménages privés
Accommodation and food services	10:07	Hébergement et restauration
Miscellaneous services	10:08	Services divers

Contents of Industry Groupings - Continued

Activités économiques comprises dans chaque agrégat - suite

Industry groupings	SIC CAE	Agrégats des activités économiques
Commercial industries less agriculture: total commercial industries less agriculture		Industries commerciales sans l'agriculture: total des industries commerciales moins l'agriculture
Non-commercial industries:		Industries non commerciales:
Highway and bridge maintenance	516	Entretien de routes et de ponts
Water systems and other utilities	576-579	Distribution d'eau et autres services d'utilité publique
Education and related services	10:01	Enseignement et services annexes
Hospitals	821	Hôpitaux
Welfare organizations	828	Organismes de bien-être
Religious organizations	10:03	Organisations culturelles
Private households	873	Ménages privés
Public administration and defence	11	Administration publique et défense
Durable manufacturing industries:		Industries manufacturières de biens durables:
Wood industries	5:08	Industrie du bois
Furniture and fixture industries	5:09	Industrie du meuble et des articles d'ameublement
Primary metals industries	5:12	Première transformation des métaux
Metal fabrication industries (except machinery and transportation equipment industries)	5:13	Fabrication de produits en métal (sauf machines et équipement de transport)
Machinery industries (except electrical machinery)	5:14	Fabrication de machines (sauf électriques)
Transportation equipment industries	5:15	Fabrication d'équipement de transport
Electrical products industries	5:16	Fabrication de produits électriques
Non-metallic mineral products industries	5:17	Fabrication de produits minéraux non-métalliques
Non-durable manufacturing industries:		Industries manufacturières de biens non durables:
Food and beverage industries	5:01	Industrie des aliments et boissons
Tobacco products industries	5:02	Industrie du tabac
Rubber and plastics products industries	5:03	Industrie du caoutchouc et des produits en matière plastique
Leather industries	5:04	Industrie du cuir
Textile industries	5:05	Industrie textile
Knitting mills	5:06	Bonneterie
Clothing industries	5:07	Industrie de l'habillement
Paper and allied industries	5:10	Industrie du papier et activités annexes
Printing, publishing and allied industries	5:11	Imprimerie, édition et activités annexes
Petroleum and coal products industries	5:18	Fabrication de produits du pétrole et du charbon
Chemical and chemical products industries	5:19	Industrie chimique
Miscellaneous manufacturing industries	5:20	Industries manufacturières diverses
Finance, insurance, real estate less royalties and imputed rent:		Finances, assurances et affaires immobilières sans les redevances et le loyer imputé:
Finance industries	9:01	Institutions financières
Insurance carriers	9:02	Assureurs
Insurance agencies and real estate industry	9:03	Agences d'assurances et affaires immobilières
Food manufacturers:		Fabricants d'aliments:
Meat and poultry products industry	101	Industries de la viande et de la volaille
Fish products industry	102	Industrie de la transformation du poisson
Fruit and vegetable processing industries	103	Préparation de fruits et de légumes
Dairy products industry	104	Industrie laitière
Flour and breakfast cereal products industry	105	Meunerie et fabrication de céréales de table
Feed industry	106	Fabrication d'aliments pour les animaux
Bakery products industries	107	Boulangerie et pâtisserie (fabrication)
Miscellaneous food industries	108	Industries alimentaires diverses

Contents of Industry Groupings – Concluded

Activités économiques comprises dans chaque agrégat – fin

Industry groupings	SIC CAE	Agrégats des activités économiques
Automotive products manufacturers:		Fabricants de produits de l'automobile:
Motor vehicle manufacturers	323	Fabricants de véhicules automobiles
Truck body and trailer manufacturers	324	Fabricants de carrosseries de camions et remorques
Motor vehicle parts and accessories manufacturers	325	Fabricants de pièces et accessoires d'automobiles
Commercial goods-producing industries:		Industries commerciales productrices de biens:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Electric power	572	Énergie électrique
Gas distribution	574	Distribution de gaz
Commercial goods-producing industries less agriculture: total goods-producing industries less agriculture		Industries commerciales productrices de biens sans l'agriculture: total des industries commerciales productrices de biens moins l'agriculture
Commercial service-producing industries:		Industries commerciales productrices de services:
Air transport	501	Transports aériens
Services incidental to air transport	502	Services auxiliaires des transports aériens
Railway transport	503	Transports ferroviaires
Water transport	504	Transports par eau
Services incidental to water transport	505	Services auxiliaires des transports par eau
Moving and storage, used goods, uncrated; other truck transport	506,507	Déménagement et entreposage de biens usagés; autre camionnage
Bus transport, interurban and rural	508	Transports interurbains et ruraux par autocar
Urban transit systems	509	Réseaux de transports urbains
Taxicab operations	512	Exploitation de taxis
Pipeline transport	515	Transports par pipe-line
Miscellaneous services incidental to transport; other transportation	517-519	Services divers auxiliaires des transports; autres transports
Storage	7 02	Entreposage
Communication	7 03	Communications
Rade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Health and welfare services less SIC 821, hospitals, and SIC 828, welfare organizations	10 02	Services médicaux et sociaux moins CAE 821, hôpitaux, et CAE 828, organismes de bien-être
Amusement and recreation services	10 04	Divertissements et loisirs
Services to business management	10 05	Services fournis aux entreprises
Personal services less SIC 873, private households	10 06	Services personnels moins CAE 873, ménages privés
Accommodation and food services	10 07	Hébergement et restauration
Miscellaneous services	10 08	Services divers
Commercial community, business, personal service industries:		Industries commerciales productrices de services socio-culturels, commerciaux et personnels:
Health and welfare services less SIC 821, hospitals, and SIC 828, welfare organizations	10 02	Services médicaux et sociaux moins CAE 821, hôpitaux, et CAE 828, organismes de bien-être

Appendix IV

GLOSSARY OF MAIN TERMS

Gross Domestic Product at Factor Cost

The value of production arising within the geographical boundaries of Canada irrespective of whether the factors of production involved are resident or non-resident. The following table shows the relationship between gross national product at market prices and gross domestic product at market prices and at factor costs.

GNP at Market Prices				
Less:	investment	income	received	from
	non-residents			
Plus:	investment income paid to non-residents			

= GDP at Market Prices
Less: net indirect taxes
Less: residual error of estimate

= GDP at Factor Cost

Indirect Taxes

Taxes assessed on producers in respect of the production, sale, purchase or use of goods and services, which they charge to the expenses of production. Also included are import duties and the operating surplus, reduced by the normal margin of profits of business units, of fiscal and similar monopolies of government.

Net Indirect Taxes

Indirect taxes less subsidies.

Subsidies

All grants on current account made by government to private industries and public corporations, and grants made by the public authorities to government enterprises in compensation for operating losses when these losses are clearly the consequence of the policy of the government to maintain prices at a level below costs of production.

Producers' Values

The value in the market of the gross output of commodities, industries, etc. at the establishment of the producers; or the sum of the values of direct inputs,

Appendice IV

GLOSSAIRE DES PRINCIPAUX TERMES UTILISÉS

Produit intérieur brut au coût des facteurs

La valeur des biens et services produits à l'intérieur des frontières géographiques du Canada, que les facteurs de production soient résidents ou non. Le tableau suivant montre la relation entre le produit national brut aux prix du marché et le produit intérieur brut aux prix du marché et au coût des facteurs.

PNB aux prix du marché				
Moins:	revenus de placement reçus des non-résidents			
Plus :	revenus de placement versés aux non-résidents			

= PIB aux prix du marché
moins: impôts indirects nets
moins: erreur résiduelle d'estimation

= PIB au coût des facteurs

Impôts indirects

Impôts payés par les producteurs, figurant dans leur coût de production et basés sur la production, la vente, l'achat ou l'utilisation de biens ou de services. Ces impôts comprennent les droits et taxes sur importations ainsi que les excédents d'exploitation des monopoles fiscaux et autres monopoles publics diminués de la marge bénéficiaire normale.

Impôts indirects nets

Impôts indirects diminués des subventions d'exploitation.

Subvention d'exploitation

Tous les transferts courants de l'administration au secteur privé et aux sociétés publiques et les transferts des pouvoirs publics aux entreprises publiques pour compenser leurs pertes d'exploitation lorsque celles-ci sont manifestement la conséquence de la politique des pouvoirs publics visant à maintenir des prix à un niveau inférieur aux coûts de production.

Valeur départ-usine

Valeur aux prix du marché de la production brute à la sortie de l'établissement du producteur. La valeur départ-usine de la production peut aussi être exprimée comme la somme des coûts

intermediate inputs at purchasers' values and indirect taxes less subsidies in respect of the commodities, industries, etc. The value added of industries at producers' values is equal to gross output of the industries at producers' values less the purchasers' values of the intermediate consumption in respect of the gross output.

Factor Cost, True

In the case of gross output of commodities, industries, etc. the producers' values less the sum of the indirect taxes, net, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs into the production of the commodities, industries, etc.; or the accumulation of the primary inputs, that is, compensation of employees, consumption of fixed capital and operating surplus, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs. The value added of industries at true factor values is equal to the true factor value of their gross output less the true factor value of their intermediate inputs (consumption).

Factor Cost, Approximate

In the case of the gross output of commodities, industries, etc. producers' values less the indirect taxes, net, in respect of the commodities, industries, etc.; or the sum of the primary inputs and the purchasers' value of the intermediate inputs. In the case of the value added of industries, the gross output of the industries valued at approximate factor values less the purchasers' value of the intermediate inputs into the industries.

Domestic Territory

In addition to the territory lying within the political frontiers of a country, (i) ships and aircraft operated by residents of the country entirely, or primarily, between two or more countries; (ii) fishing vessels, oil and natural gas rigs, and floating platforms operated by residents of the country wholly, or mainly, in international waters or engaged in extraction in areas in which the country has the exclusive right of exploitation by virtue of international agreements or pronouncements; and (iii) the embassies, consulates and military establishments of the country located abroad.

Establishment

For purposes of economic production, the establishment as a statistical unit is defined as:

The smallest operating entity which produces as homogeneous a set of goods and services as possible and for which records provide data on the value of output together with the cost of materials used and cost and quantity of labour resources employed to produce the output, and for which records or estimated allocations can provide the full range of production account variables to calculate "value added".

des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation), des impôts indirects, nets des subventions d'exploitation, et de la consommation intermédiaire aux prix d'acquisition. La valeur départ-usine de la valeur ajoutée d'une branche est égale à la valeur départ-usine de la production de cette branche diminuée de la consommation intermédiaire de celle-ci aux prix d'acquisition.

Valeur exacte au coût des facteurs

La valeur exacte au coût des facteurs de la production brute est égale à la différence entre la valeur départ-usine de la production et la somme des impôts indirects — nets des subventions d'exploitation — relatifs à la production et à la consommation intermédiaire directe et indirecte. On peut aussi l'exprimer comme la somme des coûts des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) incorporés dans la valeur du produit: c'est-à-dire la somme des coûts des facteurs utilisés dans la production des entrées intermédiaires directes et indirectes et des coûts des facteurs utilisés dans la production du produit. La valeur exacte au coût des facteurs de la valeur ajoutée est égale à la différence entre les valeurs exactes au coût des facteurs de la production et de la consommation intermédiaire.

Valeur approchée au coût des facteurs

La valeur approchée au coût des facteurs de la production est égale à la valeur de cette production aux prix départ-usine diminuée des impôts indirects — nets des subventions d'exploitation — frappant cette production. On peut encore exprimer la valeur approchée au coût des facteurs de la production comme la somme des coûts des facteurs (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) et de la consommation intermédiaire aux prix d'acquisition. La valeur approchée au coût des facteurs de la valeur ajoutée d'une branche est égale à la valeur approchée au coût des facteurs de la production de cette branche moins la consommation intermédiaire aux prix d'acquisition.

Territoire économique

Outre le territoire délimité par les frontières politiques d'un pays, le territoire économique comprend: (i) les navires et les avions entièrement ou essentiellement exploités par des résidents d'un pays entre deux ou plusieurs pays, (ii) les bateaux de pêche, les derricks pour l'extraction du pétrole et du gaz naturel et les plates-formes flottantes exploités entièrement ou essentiellement par des résidents d'un pays dans les eaux internationales ou exploités dans des zones où le dit pays possède un droit exclusif d'exploitation en vertu d'accords ou de décisions internationaux et (iii) les ambassades, les consuls et les établissements militaires du pays à l'étranger.

Établissement

Comme outil servant à mesurer la production économique, l'établissement, en tant qu'unité statistique, est défini comme:

La plus petite entité opérationnelle dont la production de biens et services est aussi homogène que possible et pour laquelle les données sont disponibles sur la valeur de sa production, le coût des matériaux utilisés et le coût et la quantité de main-d'œuvre utilisée dans la production; les données doivent aussi être disponibles ou l'allocation par estimation rendue possible pour le reste de la gamme complète des variables du compte de production qui servent au calcul de la "valeur ajoutée".

Producers

All resident establishments and similar units, public as well as private, which produce goods and services for sale at a price which is normally intended to cover their cost of production; government units engaged in selling goods and services to the public which are characteristically commodities though as a matter of policy, the prices set for the items do not approximate the costs of production; activities such as government establishments, owner-occupied dwellings, which produce similar goods or services and use similar processes and resources as the typical industries though they do not produce for the market; resident units which both acquire financial assets and incur liabilities in the market; and bodies which mainly furnish social and community services free of charge, or at sales prices which are not intended to cover fully the costs of producing the services, and which are not entirely, or mainly, financed and controlled by the public authorities and all departments, establishments and other bodies of federal, provincial and local governments which engage in such activities as administration, defence, health, educational and social services, and promotion of economic growth whether accounted for, or financed in ordinary or extraordinary budgets or extra-budgetary funds. Includes social security schemes in respect of large sections of the community imposed, controlled or financed by government, non-profit institutions entirely, or mainly financed and controlled by general government or mainly serving general government, and embassies, consulates and military establishments of a country located abroad.

Commodities

Goods and services normally intended for sale on the market at a price that is designed to cover their cost of production. Includes all goods and services produced by industries, all imported goods and services as well as goods and services which are not normally sold in the market at a price intended to cover their cost of production. These items consist of most of the gross output of producers of government services and non-profit services to households, the domestic services rendered by one household to another.

Gross Output of Industries

In general, the value in the market of all the goods and services (commodities) produced during a period of account, including work-in-progress and products for use on own account. Valuation is usually at producers' values, that is the market value at the establishment of the producer, or at approximate basic values, that is producers' values less the relevant commodity taxes, net; the insurance service charge in the case of casualty and life insurance; and the sum of the actual and imputed service charges in the case of banks and similar financial institutions. The gross output of the producers of government services and private non-profit services to households is equivalent to the purchasers' values of the intermediate consumption, compensation of employees, consumption of fixed capital of these producers. The

Producteurs

Tous les établissements résidents et les unités du même type, publics ou privés, qui produisent des biens et services pour la vente, à un prix destiné normalement à couvrir leur coût de production; les unités des administrations publiques vendant à la population des biens et des services qui sont manifestement des biens et services marchands, bien que, pour des raisons de politique générale, leur prix de vente n'atteigne pas leur coût de production; les activités telles que les entreprises publiques et les logements occupés par leurs propriétaires qui, bien qu'elles ne produisent pas pour le marché, fournissent des produits analogues à ceux des branches d'activité marchande et mettent en oeuvre des procédés et des moyens de production du même type que ceux des dites branches; les unités résidentes qui empruntent sur le marché et acquièrent des actifs financiers; les organismes qui, principalement, fournissent aux ménages des services sociaux et des services collectifs soit gratuitement, soit moyennant un prix de vente qui n'est pas destiné à couvrir entièrement le coût de production de ces services, et qui ne sont pas entièrement ou principalement financés et contrôlés par les pouvoirs publics et l'ensemble des ministères, des organismes et des autres services de l'administration (centrale ou locale) qui s'occupent de l'administration de la défense, de la santé, de l'enseignement et des services sociaux, de la promotion de la croissance économique, qu'ils soient couverts ou financés par des budgets ordinaires ou extraordinaires, ou par des fonds extra-budgétaires. Cet agent comprend les régimes de sécurité sociale destinés à de grands groupes de la collectivité qui sont imposés, contrôlés ou financés par les pouvoirs publics, les institutions sans but lucratif financées entièrement ou à titre principal par les administrations publiques ou contrôlées par elles et celles qui fournissent principalement des services à ces administrations ainsi que les ambassades, les consulates et les établissements militaires d'un pays situés à l'extérieur.

Biens et services marchands

Biens et services destinés normalement à être vendus sur le marché à un prix calculé pour couvrir leur coût de production. Sont marchands tous les biens et services produits par les branches d'activité marchande, tous les biens et services importés, ainsi que les biens et services qui ne sont pas normalement vendus sur le marché à un prix destiné à couvrir leur coût de production. Ces biens et services comprennent la plus grande partie de la production des branches non marchandes des administrations publiques et des institutions sans but lucratif au service des ménages, c'est-à-dire les services domestiques des ménages.

Production brute des branches d'activité marchande

D'une manière générale, on définit la production brute des branches d'activité comme la valeur sur le marché de tous les biens et services (marchands), achevés ou en cours, qu'elles ont produits, pour la vente ou pour leur propre compte, au cours d'une période comptable. On calcule généralement la valeur de la production aux prix départ-usine et la valeur de base approchée de la production. La valeur de la production aux prix départ-usine est sa valeur sur le marché à la sortie de l'établissement producteur. La valeur de base approchée de la production est égale à la valeur départ-usine diminuée des taxes — nettes des subventions d'exploitation — affectées aux produits. La production des services d'assurance-dommages et d'assurance-vie est définie par la rémunération des services d'assurances. La production des banques et des institutions financières analogues est égale à la somme des rémunérations, effectives ou imputées,

gross output of domestic services rendered by households consists of the compensation of employees only.

Intermediate Input of Industries

Goods and services (commodities) used in production, including repair and maintenance of the capital stock, research, development and prospecting, indirect outlays on financing capital formation, such as floatation costs for loans, and transfer costs involved in purchases and sales of land, intangible assets and financial claims.

Intermediate Input of Producers of Government Services

Acquisitions (purchases and transfers in kind) of new goods and services (mainly commodities) on current account, less net sales of similar second-hand goods and scraps and wastes therefrom, including durable goods acquired primarily for military purposes.

Intermediate Input of Producers of Private Non-Profit Services to Households

Acquisitions (purchases and transfers in kind) of new goods and services (commodities) less net sales of similar second-hand goods and scraps and wastes therefrom. Excluded are second-hand goods received for distribution to households without renovation or alteration.

Operating Surplus

Gross output at producers' values less the sum of intermediate consumption, compensation of employees, consumption of fixed capital and indirect taxes reduced by subsidies.

Factor Incomes

Compensation of employees by, and net operating surplus of, producers. The net domestic product is often valued at factor incomes.

Labour Income

All compensation (wages, salaries, supplementary labour income) earned by employees residing in Canada or employed abroad by the Federal Government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers.

des services bancaires. La production des branches non marchandes des administrations publiques et des institutions privées sans but lucratif est égale à la valeur départ-usine de la consommation intermédiaire, de la rémunération des employés et de la consommation de capital fixe de ces producteurs. La production brute des services domestiques des ménages comprend seulement la rémunération des employés.

Entrées intermédiaires des branches d'activités marchandes

Biens et services marchands consommés dans la production, y compris la réparation et l'entretien courant du stock de capital, la recherche, le développement et la prospection, les dépenses indirectes pour le financement de la formation de capital telles que les frais d'émission des emprunts et les frais de mutation encourus lors de l'achat et de la vente de créances.

Entrées intermédiaires des branches non marchandes des administrations publiques

Acquisitions (achats et transferts en nature) de biens neufs et de services (principalement des biens et services marchands) en compte courant, y compris les biens durables acquis principalement à des fins militaires, diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts et de déchets.

Entrées intermédiaires des branches non marchandes des institutions privées sans but lucratif au service des ménages

Acquisitions (achats et transferts en nature) de biens neufs et de services (biens et services marchands) diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts ou de déchets. Les biens d'occasion reçus pour être distribués gratuitement aux ménages, sans remise à neuf ni transformation, ne sont pas compris dans les ventes nettes de biens d'occasion.

Excédent net d'exploitation

Différence entre la production aux prix départ-usine et la somme de la consommation intermédiaire, de la rémunération des salariés, de la consommation de capital fixe et des impôts indirects diminués des subventions d'exploitation.

Revenus des facteurs

Rémunération des salariés par les producteurs et excédent net d'exploitation de ces derniers. Le produit intérieur net est souvent évalué aux revenus des facteurs.

Revenu du travail

La rémunération totale (salaires, traitements, revenu supplémentaire du travail) versée aux salariés demeurant au Canada ou aux personnes employées à l'étranger par l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les agriculteurs ne font pas partie du revenu du travail.

Wages and salaries

Earnings from employment for work performed. Included are: directors fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retroactive wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc.

Supplementary Labour Income

Payments made by employers for the future benefit of their employees, comprising employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

Royalty

Payment for concessions, the use of patented or copyrighted materials, and similar rights; treated as income from property.

Accrual Basis

The item, for example, outlay, income, obligation, other flow, is recorded as of the time at which it is incurred or earned.

Cash Basis

The item, for example, outlay, income, other receipt, is recorded as of the time at which the payment is actually made or received.

Current Repairs and Maintenance

Outlays for repairs to fixed assets. Includes outlays on new parts and attachments of fixed assets which have an expected life of use of one year or somewhat more but which are short-lived relative to the fixed asset itself, or are of relatively small value. Major alterations in, or additions to, machinery, equipment, structures or other fixed assets which significantly extend their expected life-time of use, productivity, or the character or volume of the services they render, are considered capital acquisitions.

Final Use of Goods and Services

The disposition of goods and services to final consumption expenditure, gross fixed capital formation, increases in stocks and exports.

Salaires et traitements

Les gains d'un emploi en retour du travail exécuté comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, les revenus en nature, les allocations imposables et les rappels de salaire. Les estimations de salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc.

Revenu supplémentaire du travail

Paiements effectués par l'employeur dans l'intérêt futur de ses salariés, c'est-à-dire les cotisations de l'employeur aux régimes de prévoyance et aux caisses de retraite, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

Redevances, revenus des actifs incorporels r.d.a.

Droits de concession, paiement pour l'utilisation de brevets, droits d'auteur, etc. Ces redevances sont traitées comme un revenu de la propriété.

Comptabilité d'exercice

La grandeur considérée, qu'il s'agisse d'une dépense, d'un revenu, de l'obligation d'un paiement ou de tout autre flux, est enregistrée au moment où elle est engagée (dans le cas d'une dépense) ou gagnée (dans le cas d'une recette).

Comptabilité de caisse

La grandeur considérée: dépense, revenu, autre recette, est enregistrée au moment du paiement ou de la recette même.

Entretien courant

Dépenses pour les réparations des actifs fixes. Les achats de pièces et d'accessoires dont la valeur est relativement faible ou dont la durée de vie est d'un an ou légèrement supérieure à un an, mais de toute façon inférieure à celle de l'équipement principal, sont inclus dans les dépenses d'entretien courant. Modifications ou additions importantes apportées aux machines, au matériel, aux constructions et aux autres actifs fixes qui en augmentent notablement la durée d'utilisation ou la productivité, modifient la nature des services qu'ils rendent ou en accroissent le volume.

Emplois finals de biens et services

Consommation finale, formation brute de capital fixe, variation des stocks et exportation.

SUPPLEMENT

SUPPLÉMENT

It was discovered that the 1980 data for Fishing (SIC 041) were incorrect. In addition, errors were discovered in certain monthly and quarterly series. The corrections have been made and the amended data are shown in the attached tables.

On s'est aperçu que les données de 1980 pour l'industrie de la pêche (CAE 041) étaient inexactes. De plus, on a décelé des erreurs dans certaines séries mensuelles et trimestrielles. Les rectifications ont été apportées et les données corrigées sont présentées aux tableaux ci-joints.

TABLE 1. Gross Domestic Product at Factor Cost

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Industry Measures Section,
Industry Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0579) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zénith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831

Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zénith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Zénith 2-2015

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des mesures industrielles,
Division du produit industriel,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0579) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Terre-Neuve et Labrador	Zénith 0-7037
Nouvelle-Ecosse, Nouveau-Brunswick et Ile-du-Prince-Edouard	1-800-565-7192
Québec	1-800-361-2831

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- * confidential to meet secrecy requirements of the Statistics Act.

A Note on CANSIM®

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The last pages contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve constant price Gross Domestic Product, monthly, without seasonal adjustment, you must use "D 144336".

For further information write to **CANSIM** Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- * confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note au sujet de CANSIM®

Les données figurant dans cette publication ont été extraites de **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les dernières pages renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries de **CANSIM**. Ainsi, pour extraire le produit intérieur brut en prix constants mensuel avant désaisonnalisation, il suffit d'utiliser "D 144336".

Pour plus de renseignements, écrivez à la Division de **CANSIM** Division, Statistique Canada, Ottawa, K1A 0Z8, ou téléphoner à (613) 995-7406.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 61 provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be possible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on the other (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as prescribed in the United Nations publication: *A System of National Accounts* (Studies in Methods. Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, no 2, rév. 3 Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Gross Domestic Product and its components may be obtained from the following Statistics Canada publications:

Catalogue 61-213. *Gross Domestic Product by Industry*, 1982 issue, for the 1971-1982 period.

Catalogue 61-005. *Gross Domestic Product by Industry*, the June 1983 issue and current issues for the reference period beginning January 1983.

The same data are available in the following **CANSIM** matrices:

	Matrix numbers
Gross Domestic Product:	
Monthly	1131
Quarterly	1130
Annual	1125-1129

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in **CANSIM** matrix 389 or can be made available upon request by contacting Marsa Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Gross Domestic Product and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry — (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following **CANSIM** matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUES

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur brut et de ses composantes sur la base 1971 = 100 à partir de 1971:

N° 61-213 au catalogue. *Produit intérieur brut par industrie*, publication de 1982 consacrée à la période 1971-1982.

N° 61-005 au catalogue. *Produit intérieur brut par industrie*, l'édition de juin 1983 et les publications courantes présentent des données pour la période de référence commençant en janvier 1983.

On peut obtenir les mêmes données des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur brut:	
Mensuel	1131
Trimestriel	1130
Annuel	1125-1129

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de **CANSIM** ou on peut se procurer ces données en s'adressant à Marsa Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur brut et les composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry — (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de **CANSIM**:

	Numéros de matrice
Produit intérieur réel:	
Annuel	383
Trimestriel	15
Mensuel	1421
Indice de la production industrielle:	
Annuel	384
Mensuel	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-502. See this publication for description of concepts, sources and methods for the Index of Industrial Production.

Catalogue 61-505. See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of Origin.

Catalogue 61-506. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

Catalogue 61-510. See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept.

Catalogue 61-516. See this publication for technical note concerning the introduction of annual estimates of Real Domestic Product by industry expressed in dollars, the incorporation of the results of the 1971 census of merchandising and services for a large number of the service-producing industries, the introduction of annual estimates of gross output, intermediate input, and value added in current and constant (1961) prices and the corresponding implicit price indexes for selected manufacturing industries and the adoption of the final 1961 weighting system.

Catalogue 61-213. See the 1971-1974 issue for the technical note concerning the implementation of a 1971 weight and reference base and the adoption of the 1970 Standard Industrial Classification. See this issue concerning revisions to the 1971 (base year) Gross Domestic Product distribution and the introduction of annual estimates of gross output, intermediate inputs and value added in current year prices and in constant (1971) prices for all industries. See Appendix 1 for 1) a complete distribution of Gross Domestic Product, 2) the types of indicators used and 3) a quality assessment for both published and unpublished industry estimates. See Appendix 2 for the content of the "Industry Groupings" and Appendix 3 for the content of the "Groupings of Industries by Demand Category".

Catalogue 61-202. See this publication for estimates and methodological summaries of annual current and constant (1971) price provincial Gross Domestic Product for selected industries.

CONCEPTS, SOURCES ET MÉTHODES

N° 61-502 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

N° 61-505 au catalogue. Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

N° 61-506 au catalogue. Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

N° 61-510F au catalogue. Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entraîné l'introduction du concept "d'activité totale".

N° 61-516 au catalogue. Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

N° 61-213 au catalogue. Se rapporter à la note technique de la livraison de 1971-1974 concernant l'introduction des bases de référence et de pondération de 1971 et l'adoption de la Classification des Activités Économiques de 1970. Se rapporter à cette livraison concernant les révisions à la distribution du produit intérieur brut de 1971 (année de référence) et l'introduction des estimations de la production brute, la consommation intermédiaire et la valeur ajoutée en prix de l'année courante et en prix constants de 1971 pour toutes les industries. Se rapporter à l'appendice 1 pour 1) une distribution détaillée du produit intérieur brut, 2) les types de projecteurs et 3) une évaluation qualitative concernant les estimations publiées et non publiées par industrie. Se rapporter à l'appendice 2 pour les listes d'industries comprises dans chaque agrégat d'activités économiques et, à l'appendice 3, pour celles comprises dans chaque groupe d'activités économiques par type de demande.

N° 61-202 au catalogue. Se rapporter à cette publication, qui contient les sommaires des méthodes et les estimations annuelles provinciales du produit intérieur brut en prix courants et en prix constants de 1971 pour certaines industries.

TECHNICAL NOTE(1)

This issue of the publication "Gross Domestic Product by Industry" presents annual estimates in current and constant (1971) prices for the total economy by industry, and monthly and quarterly estimates of gross domestic product at factor cost in constant (1971) prices. Quarterly and monthly data are presented in both seasonally adjusted and unadjusted form.

To assist users in analysis of the data, special aggregations of gross domestic product by demand category have been prepared. Each industry's total gross domestic product has been assigned to a demand or use category according to the major use or disposition of its production (see Appendix III for a listing of the contents of each demand category).

Revisions to previously published data are due to the incorporation of statistical revisions to data series underlying the estimates, the introduction of some methodological changes, and in the case of the monthly and quarterly measures, the incorporation of revised seasonal factors.

The gross domestic product (GDP) estimates in this publication are based on the establishment as the statistical unit. The use of the establishment as the basic unit usually results in a different industrial distribution from that contained in Table 28 of the National Income and Expenditure Accounts (catalogue 13-201). The estimates in that table have been prepared by summing labour income and inventory valuation adjustments — based on the establishment — and data for investment income and for capital consumption allowances collected and tabulated using the company or enterprise as the basic statistical unit.

In preparing estimates of an industry's production, all activities of establishments classified to the industry are included, that is, the "total activity" concept is used. Thus if an establishment classified to manufacturing also transports and sells its own goods at the wholesale level, these secondary activities will be included in the establishment's production and therefore in the manufacturing industry. Furthermore, the industry includes establishments classified to all sectors of the economy — government, business and personal.

In addition to GDP estimates, gross output and intermediate input estimates have been prepared by industry. At the industry level the gross output and intermediate input estimates are the sum of the individual establishments. No attempt has been made to eliminate transactions between establishments within the same industry, that is, to derive "net sector" estimates.

(1) See Appendix IV for a glossary of the main terms.

NOTE TECHNIQUE(1)

Ce numéro de la publication "Produit intérieur brut par industrie" contient des estimations annuelles par industrie (branche d'activité) en prix courants et constants (1971) pour l'ensemble de l'économie, et des estimations mensuelles et trimestrielles du produit intérieur brut au coût des facteurs en prix constants (1971). Les données trimestrielles et mensuelles sont publiées sous forme désaisonnalisée et non désaisonnalisée.

Afin d'aider les utilisateurs dans l'analyse des données, on a élaboré des agrégats spéciaux du produit intérieur brut par catégorie de demande. Le produit intérieur brut total de chaque branche d'activité a été affecté à une catégorie de demande selon la principale utilisation de sa production (voir l'appendice III pour une liste du contenu de chaque catégorie de demande).

Les révisions apportées aux données publiées par le passé sont dues aux révisions statistiques des séries qui servent de base aux estimations, à certaines modifications méthodologiques, et, dans le cas des mesures mensuelles et trimestrielles, à l'utilisation de coefficients saisonniers révisés.

L'établissement constitue l'unité statistique qui sert de base aux estimations du produit intérieur brut (PIB) présentées ici. L'utilisation de l'établissement comme unité de base se traduit généralement par une répartition par branche d'activité différente de celle qui est présentée au tableau 28 des comptes nationaux des revenus et des dépenses (n° 13-201 au catalogue). On a obtenu ces estimations en additionnant le revenu du travail et les ajustements de la valeur des stocks selon l'établissement et les données qui ont été recueillies et totalisées sur les revenus de placement et les déductions pour amortissement, et qui ont la compagnie ou l'entreprise comme unité statistique de base.

Pour l'estimation de la production d'une branche d'activité, on prend en considération toutes les activités des établissements qui ont été classées à cette branche d'activité, c'est-à-dire qu'on se base sur le concept d'"ensemble des activités". Ainsi, si un établissement qui a été classé au secteur manufacturier transporte et vend en gros ses propres produits, ces activités secondaires feront partie de la production de l'établissement et, par conséquent, de celle du secteur manufacturier. En outre, la branche d'activité comprend des établissements classés à tous les secteurs de l'économie, qu'il s'agisse d'administrations publiques, d'entreprises ou de particuliers.

En plus des estimations du PIB, on a préparé des estimations de la production brute et des entrées intermédiaires par branche d'activité. On obtient ces estimations en prenant la somme de ces données pour les différents établissements. On n'a pas éliminé les transactions entre les établissements au sein d'une même branche d'activité, en d'autres termes, on n'a pas essayé d'obtenir d'estimations nettes pour le secteur.

(1) Voir l'appendice IV pour un glossaire des principaux termes utilisés.

The current price estimates of GDP at factor cost (or value added) by industry can be measured directly by summing the factor incomes and depreciation or indirectly by deducting the cost of the intermediate goods and services used in the production process from the value of gross production or output. The method adopted for any particular industry is determined by the availability of data. If possible, estimates based on both methods have been prepared and discrepancies have been resolved.

Gross output is frequently estimated as the sum of sales and inventory change for finished goods and work-in-progress. Because the System of National Accounts uses an accrual method of valuation, typically the reported value of inventory change must be adjusted by the amount of the change which can be attributed to changes in prices (this is called the "inventory valuation adjustment"). The revalued inventory change is called "the value of the physical change" in inventories. Similarly, intermediate inputs must be adjusted to take account of the extent to which raw materials used in production during the current period were purchased in a previous period.

For any industry, gross output can be described as the total of all costs, intermediate and factor. In some cases, particularly for the non-commercial industries, data on gross output are not available and must be estimated indirectly as the sum of total costs. In many of these industries, data on intermediate inputs are not available on an establishment basis so that GDP has been used as a proxy for gross output. It should be noted that for trade, the gross output is the total value of sales, rather than the gross margin⁽²⁾. This applies also to secondary trading activity in other industries.

Constant price series represent the revaluation of quantities of production using prices of a base period. In principle constant price data should be derived by deflating current price data by a currently weighted (Paasche) price index to yield a base-weighted (Laspeyres) quantum series. In practice true Paasche price indexes do not exist so this procedure is approximated by using Laspeyres price indexes to deflate the values of commodities (goods or services) produced or used at the lowest level of commodity detail possible. Constant dollar data for individual commodities may also be derived by multiplying current period quantities of production by their price in the base year. The constant dollar data for gross output or intermediate inputs is the sum of the values for the individual commodities.

The constant price series for GDP is derived as the difference between gross output and intermediate inputs in constant prices. This technique is called "double deflation".

On peut estimer le PIB en prix courants, au coût des facteurs (ou valeur ajoutée) par branche d'activité de façon directe en additionnant les revenus des facteurs et l'amortissement ou, de façon indirecte, en déduisant de la valeur de la production brute le coût des biens et services intermédiaires qui ont été utilisés au cours de la production. Le choix de la méthode pour une branche déterminée dépend de l'existence des données. Dans la mesure du possible, on a effectué des estimations selon les deux méthodes et on a réconcilié les divergences.

On estime souvent la production brute à l'aide de la somme des ventes et des variations des stocks pour les produits finis et les produits en cours. Comme le système de comptabilité nationale se base sur une méthode de comptabilité d'exercice, il arrive souvent que la valeur déclarée de la variation des stocks doive être ajustée par la partie de la variation imputable à la variation des prix. C'est ce qu'on appelle "l'ajustement de la valeur des stocks". La variation réévaluée correspond à la "valeur de la variation matérielle" des stocks. De même, les entrées intermédiaires doivent être ajustées afin de tenir compte des matières premières qui ont été utilisées dans la production au cours de la période courante mais qui ont été achetées durant une autre période.

On peut représenter la production brute de toute branche d'activité comme le total de ses coûts, qu'il s'agisse d'entrées intermédiaires ou de facteurs de production. Dans certains cas, particulièrement pour les branches d'activité non commerciales, il n'existe pas de données sur la production brute et il faut estimer celle-ci indirectement à partir de la somme des coûts totaux. Dans un grand nombre de ces branches d'activité, nous ne disposons pas de données sur les entrées intermédiaires pour l'établissement et il faut se servir du PIB à la place de la production brute. À noter que, dans le commerce, la production brute correspond à la valeur totale des ventes plutôt qu'à la marge brute⁽²⁾. C'est également le cas des activités commerciales secondaires dans les autres branches d'activité.

Les séries en prix constants résultent d'une réévaluation des quantités produites à l'aide des prix d'une période de base. Pour calculer ces séries, on doit en principe procéder à la déflation des données en prix courants à l'aide d'un indice des prix à pondération courante (indice de Paasche) afin d'obtenir une série de quantité pondérée en fonction de l'année de base (indice de Laspeyres). En pratique, il n'existe pas de vrais indices de Paasche et on se contente d'utiliser des indices de Laspeyres pour corriger de leur variations de prix les valeurs des biens ou services (produits ou utilisés) au plus bas niveau de détail possible. On peut également obtenir des données en dollars constants pour des marchandises déterminées en multipliant les quantités produites durant la période courante par leur prix durant l'année de base. Pour obtenir la production brute ou les entrées intermédiaires en dollars constants, on calcule la somme des valeurs pour les différentes marchandises.

On obtient les séries en prix constants du PIB en calculant la différence entre la production brute et les entrées intermédiaires en prix constants. C'est ce qu'on appelle la "double déflation".

(2) Gross margin is defined as sales less cost of goods sold.

(2) La marge brute est définie comme la valeur des ventes moins le coût des biens vendus.

For some industries, data limitations do not permit the use of the double deflation technique. In these cases, the constant price estimates of GDP may be based on the movement of gross output or intermediate inputs by assuming a fixed relationship between gross output and intermediate inputs. In other cases, labour input may be used as a projector of output — sometimes with an estimated productivity change. Other related projectors may also be used. Appendix I contains a listing of the types of indicators used in the preparation of constant price estimates.

For the monthly measures, it is generally true that there are many fewer data available to prepare the estimates and these data are usually not as reliable as the annual data. In only a few cases are data available to permit the preparation of gross output and intermediate input estimates. The monthly data usually do not include secondary activities and they may not cover all establishments in the industry or all commodities produced by the industry.

The relationship between annual and monthly measures in the period for which both are available is used to estimate necessary adjustments to the monthly data in the current period. At the end of the current calendar year a preliminary review of the monthly estimates is undertaken and they may be revised in the light of other related data.

The monthly data are also adjusted by a factor that reflects variations in the number of "trading days" within each month to derive the seasonally unadjusted data and by a seasonal adjustment factor to derive the seasonally adjusted data. The seasonal adjustment factors are derived using the "X-11 Arima"(3) method. Any trading day adjustments generated by this program are based not only on the number of days in the month but also on the relative importance of each day of the week.

(3) A variant developed by Statistics Canada on the "X-11" method originally developed by the U.S. Bureau of the Census.

Dans certaines branches d'activité, les limites des données ne permettent pas d'utiliser la technique de la double déflation. Dans ce cas, on peut faire reposer les estimations du PIB en prix constants sur les variations de la production brute ou des entrées intermédiaires si l'on suppose une relation fixe entre la première et les dernières. Dans d'autres cas, on peut se servir des entrées de main-d'oeuvre et même faire varier leur productivité pour projeter la production. Il existe également d'autres bases de projection. L'appendice I contient une liste des types d'indicateurs qui servent à la préparation des estimations en prix constants.

Pour les mesures mensuelles, il est vrai qu'il y a généralement beaucoup moins de données sur lesquelles fonder les estimations. En outre, ces données sont habituellement moins fiables que les données annuelles. Ce n'est que rarement que les données permettent l'estimation de la production brute et des entrées intermédiaires. En règle générale, les données mensuelles ne portent pas sur les activités secondaires et il arrive qu'elles ne comprennent pas tous les établissements d'une branche d'activité ou tous les produits fabriqués par une branche d'activité.

Pour estimer les ajustements qu'il faut apporter aux données mensuelles de la période courante, on se fonde sur la relation entre les mesures annuelles et mensuelles au cours des périodes pour lesquelles on dispose des deux types de données. À la fin de l'année civile courante, on entreprend un examen préliminaire des estimations mensuelles et on procède éventuellement à leur révision à l'aide d'autres données.

Les données mensuelles pour la série non désaisonnalisée sont corrigées à l'aide d'un facteur qui traduit les variations dans le nombre de "jours commerciaux" pour chaque mois tandis que les données pour la série désaisonnalisée le sont au moyen d'un coefficient de désaisonnalisation. Les coefficients de désaisonnalisation sont obtenus grâce à la méthode "X-11-ARMMI"(3). Les corrections se rapportant aux jours commerciaux sont fondées sur le nombre de jours dans le mois et sur l'importance relative de chaque jour de la semaine.

(3) Une variante élaborée par Statistique Canada à partir de la méthode "X-11" mise au point par le U.S. Bureau of the Census.

REVISIONS TO GROSS DOMESTIC PRODUCT IN CONSTANT (1971) PRICES

The revisions to GDP apply to the period 1976 to 1982.

Annual measures of GDP have been calculated for an additional year, revisions to source data have been incorporated and methodology has been changed for some industries.

The monthly data have been revised due to the incorporation of the latest annual levels, revisions to the monthly data on which the output measures are based and revisions to the seasonal factors.

The revisions to year-to-year movements in certain aggregates are included in the following table.

RÉVISIONS DU PRODUIT INTÉRIEUR BRUT EN PRIX CONSTANTS DE 1971

Les révisions au PIB concernent la période allant de 1976 à 1982.

On a calculé les chiffres annuels du PIB pour une année supplémentaire, puis incorporé des révisions aux données de référence et changé la méthodologie pour un certain nombre d'activités économiques.

Les données mensuelles ont été révisées en vue de prendre en compte l'incorporation des niveaux annuels les plus récents, les modifications apportées aux données mensuelles servant au calcul de production et les révisions des facteurs saisonniers.

Le tableau suivant présente les révisions apportées aux variations annuelles de certains agrégats.

REVIEW OF 1971-1982

Gross Domestic Product

During the 1971-1981 period Gross Domestic Product in current prices (GDP) grew at an average annual rate of 13.1%. The growth rate was 12.8% for the goods-producing industries and 13.3% for the service-producing industries. At an average annual rate of 18.0%, mines, quarries and oil wells had the highest growth rate over the period. However, over the same period its average rate of price change was 18.2%. Trade had a lower than average growth rate of 11.9%.

Prices

The implicit price index of GDP increased 2 1/2 times to a level of 254.0 in 1981. Double-digit price increases occurred in 1973, 1974, 1975, 1979 and 1980.

The largest increases in the implicit price index of GDP were in the primary industries, particularly mining, and also public administration and defence. In mining almost all components registered very high rates of price change, particularly crude petroleum and natural gas where the price index reached a level of 800 and gold mines whose price index was almost 1,300 in 1981, reflecting very high changes in the gross output prices of these industries. Petroleum refining recorded one of the largest price increases in manufacturing. Other large increases in price in manufacturing were in bakery products, flour and breakfast cereal, fish products, pulp and paper, shipbuilding and repair, railroad rolling stock, aircraft and aircraft parts manufacturers and industrial chemicals. Among the service industries, some of the largest increases in price were in post office and a number of non-commercial industries including education and related services, hospitals, and provincial and local administration.

Gross Domestic Product in Constant 1971 Prices

Over the 1971-1982 period the Canadian economy, as measured by constant (1971) price Gross Domestic Product (real GDP), increased at an average annual rate of 3.2%. This is significantly less than the average rate of 5.5% for the 1961-1971 period. The goods-producing and service-producing industries grew at average annual rates of 2.1% and 3.9% respectively. The corresponding figures for the 1961-1971 period were 5.6% and 5.5%.

A majority of industries grew more slowly from 1971 to 1982 than from 1961 to 1971. Notably slower growth rates occurred in several primary and energy industries, in motor vehicle manufacturing, as well as a majority of

REVUE DE 1971-1982

Produit intérieur brut

Au cours de la période 1971-1981, le produit intérieur brut en prix courants (PIB) a augmenté à un taux annuel moyen de 13.1%. Le taux de croissance a été de 12.8% pour les branches d'activité productrices de biens et de 13.3% pour les branches d'activité productrices de services. Avec un taux annuel moyen de 18.0%, les mines, carrières et puits de pétrole ont affiché le taux de croissance le plus élevé au cours de cette période. Cependant, au cours de la même période, le taux moyen de variation des prix a été de 18.2%. Le commerce a connu une croissance inférieure à la moyenne, soit 11.9%.

Prix

L'indice implicite de prix du PIB a augmenté de 2 1/2 fois pour atteindre le niveau de 254.0 en 1981. On a observé des augmentations de prix supérieures à 10% en 1973, 1974, 1975, 1979 et 1980.

Les plus fortes augmentations de l'indice implicite de prix du PIB ont été observées dans le secteur primaire, particulièrement dans les mines, ainsi que dans l'administration publique et la défense. Dans les mines, presque toutes les composantes ont enregistré de très hauts niveaux de variation des prix, particulièrement le pétrole brut et le gaz naturel, où l'indice de prix a atteint un niveau de 800, et les mines d'or dont l'indice des prix s'établissait à presque 1,300 en 1981, traduisant de très forts mouvements des prix de la production brute dans ces branches d'activité. Le raffinage du pétrole a enregistré une des plus importantes augmentations de prix du secteur de la fabrication. D'autres fortes augmentations de prix dans le secteur de la fabrication ont été observées dans la boulangerie et la pâtisserie, la farine et les céréales de table, les produits du poisson, les pâtes et papiers, la construction et la réparation de navires, le matériel ferroviaire roulant, la fabrication d'aéronefs et de pièces, et les produits chimiques industriels. Parmi les branches d'activité productrices de services, certaines des augmentations de prix les plus importantes ont été observées dans les postes et un bon nombre de branches d'activité non marchandes, dont l'éducation et les services connexes, les hôpitaux ainsi que les administrations provinciales et locales.

Produit intérieur brut en prix constants de 1971

Au cours de la période 1971-1982, l'économie canadienne, mesurée par le produit intérieur brut en prix constants (1971) (PIB réel), a augmenté à un taux annuel moyen de 3.2%. Ceci est nettement inférieur au taux moyen de 5.5% pour la période 1961-1971. Les branches d'activité productrices de biens et de services ont augmenté à des taux annuels moyens de 2.1% et 3.9% respectivement. Les chiffres correspondants pour la période 1961-1971 étaient de 5.6% et 5.5%.

Une majorité des branches d'activité ont augmenté plus lentement entre 1971 et 1982 qu'entre 1961 et 1971. Des taux de croissance nettement plus lents ont été observés dans plusieurs branches d'activité primaires et productrices d'énergie,

other manufacturing industries, residential construction and education and related services.

The emphasis on energy conservation beginning with the sharp price increases of the mid-70's contrasts strongly with the development, expansion and energetic marketing of energy resources in the 1960's. Pipeline expansion in the 1960's permitted increased exports of oil and natural gas as well as an expansion of domestic markets for natural gas. Iron mines in Labrador and Quebec were also expanded in the 1960's. Output of the U.S. steel industry declined in the late seventies due to a slowdown in the U.S. economy and increasing competition from foreign producers, causing a decline in Canadian exports after 1979. For motor vehicle manufacturing, the strong increase between 1965 and 1969 can be traced directly to the Canada-U.S. auto pact.

The 1960's were also a period of sharp expansion of educational services at all levels, with the largest increases occurring in universities and other post-secondary education. In the 1970's there was a general slowdown as the rate of increase in the number of school age children slowed and the capacity of educational facilities caught up with demand.

Three cycles in real GDP can be identified in the 1971-1982 period. Real GDP reached its first monthly peak in May of 1974 and fell to its cyclical low point in March of 1975. The second monthly peak was in October of 1979 and the trough in June 1980. One year later real GDP reached its third monthly peak and dropped by 8% to October 1982. This decline was the most severe in the post — World War II period. During the most recent downturn, the goods-producing industries fell 16% and the service-producing industries 3%.

Agriculture grew at an average annual rate of 2.2% over the 1971-1982 period. Output was below the 1971 annual level from 1972 to 1974, reached a peak 14% above the 1971 level in 1977 and then declined in 1978 and 1979, after which it grew to the end of the period. In 1974 crop production was more than 23% below its 1971 level, rising to 20% above it by 1978. Output then fell in 1979 and increased rapidly from 1980 to 1982. The 1982 increase in crop production was the largest contributor to the overall increase in Agriculture for that year. Dairy production fluctuated within relatively narrow bounds above and below its 1971 level throughout the period. Livestock production followed a general upward trend, finishing in 1982 at a level almost 30% higher than 1971.

The average annual growth rate for **forestry** was 0.5% to 1982. Gross output prices increased at 10.5% per year over the 1971-1981 period and value-added prices by 10.3% per year. Annual declines in 1981 and 1982 totalling more than 24% left the 1982 real GDP for forestry 7% below 1971. The previous low level occurred in 1975 when output was 2% below the 1971 level.

dans la fabrication de véhicules automobiles ainsi que dans une majorité d'autres branches d'activité du secteur de la fabrication, de la construction résidentielle et de l'éducation et des services connexes.

L'accent mis sur la conservation de l'énergie qui a débuté avec les fortes augmentations de prix du milieu des années 70 contraste fortement avec le développement, l'expansion et la mise en marché vigoureuse des ressources énergétiques des années 60. L'expansion des pipe-lines des années 60 a permis d'augmenter les exportations de pétrole et de gaz naturel et d'étendre les marchés intérieurs pour le gaz naturel. Les mines de fer au Labrador et au Québec ont également pris de l'expansion dans les années 60. La production de l'industrie américaine de l'acier a diminué à la fin des années 70 à cause d'un ralentissement de l'économie américaine et d'une concurrence accrue de la part des producteurs étrangers, ce qui a entraîné une diminution des exportations canadiennes après 1979. Dans le cas de la fabrication de véhicules automobiles, la forte augmentation entre 1965 et 1969 peut se rattacher directement au pacte automobile Canada-États-Unis.

Les années 60 ont également été une période de forte expansion des services d'éducation à tous les niveaux, et les plus fortes augmentations se sont produites dans le secteur universitaire et les autres secteurs de l'éducation postsecondaire. Dans les années 1970, il s'est produit un ralentissement général alors que le taux d'augmentation du nombre d'enfants d'âge scolaire diminuait et que la capacité des installations d'éducation rejoignait la demande.

On peut identifier trois cycles du PIB réel au cours de la période 1971-1982. Le PIB réel a atteint son premier sommet mensuel en mai 1974 et est tombé à son creux cyclique en mars 1975. Le second sommet mensuel a été atteint en octobre 1979 et le creux en juin 1980. Un an plus tard, le PIB réel a atteint son troisième sommet mensuel et a diminué de 8% jusqu'en octobre 1982. Cette diminution a été la plus importante de toute la période depuis la seconde guerre mondiale. Au cours de la plus récente récession, les branches d'activité productrices de biens ont diminué de 16% et celles productrices de services, de 3%.

Agriculture a augmenté à un taux annuel moyen de 2.2% au cours de la période 1971-1982. La production s'est située au-dessous du niveau annuel de 1971 entre 1972 et 1974, a atteint en 1977 un sommet supérieur de 14% à celui de 1971 et a ensuite diminué en 1978 et 1979, après quoi elle a augmenté jusqu'à la fin de la période. La récolte de 1974 se situait à plus de 23% au-dessous du niveau de 1971, alors qu'elle le dépassait de 20% en 1978. La production a alors baissé en 1979 pour augmenter ensuite rapidement entre 1980 et 1982. L'augmentation de la récolte en 1982 a contribué le plus à la hausse cette année-là. La production laitière a fluctué à l'intérieur d'une fourchette relativement étroite au-dessus et au-dessous de son niveau de 1971 tout au long de la période. La production de bétail a suivi une tendance générale vers le haut pour atteindre en 1982 un niveau supérieur de presque 30% à celui de 1971.

Le taux de croissance annuel moyen pour les **forêts** était de 0.5% jusqu'en 1982. Les prix de la production brute ont augmenté de 10.5% par année au cours de la période 1971-1981 et les prix à la valeur ajoutée de 10.3% par année. Des diminutions annuelles en 1981 et 1982 totalisant plus de 24% ont ramené le PIB réel des forêts pour 1982 à 7% au-dessous de 1971. Le creux précédent s'était produit en 1975, alors que la production

Levels of output in this industry are largely determined by the requirements of the wood industries and pulp and paper. In turn, the main determinant of output of the wood industries is residential construction activity in North America, which has been at very low levels since 1980 and was particularly weak during most of 1982.

Fishing and trapping increased at an average annual rate of 3.1%. Between 1971 and 1975 the industry fell 14% below its 1971 level. After 1975 the industry grew steadily to a peak in 1979 which was 24% above 1971. There was no growth after 1979.

Mines, quarries and oil wells had the lowest average annual rate of growth (-0.6%) and the highest rate of increase in the implicit price index of GDP (18.2%). Annual output reached its highest level for mining and its two major components, metal mines and mineral fuels, in 1973. A general weakness resulted in a real GDP decline of 12% in total mining in 1975. A 10% decline in mining in 1978 was strike-related; strikes in iron mines and other metal mines led to a 26% decline in metal mines. The industry recovered somewhat in 1979 and 1980, then fell in both 1981 and 1982. Metal mines and non-metal mines were particularly weak in 1982, falling 24% and 22% respectively. However, a sizeable increase in the export volumes of crude oil helped sustain output levels for mineral fuels.

The manufacturing industries averaged a 2.2% annual rate of growth from 1971-1982. At 8.8% the growth rate for the implicit GDP price index was below that of the total economy (9.5%) in the 1971-1981 period. Growth rates for durable and non-durable manufacturing were similar; however, durable manufacturing industries exhibited a more cyclical behaviour. Both durable and non-durable manufacturing peaked in 1974. Manufacturing grew more than 23% from 1971 to 1974 and declined by 6% in 1975. From 1976 to 1979 the total advance was 13%, followed by a 4% decline in 1980 and a 2% increase in 1981. Manufacturing suffered a 12% drop in 1982.

Among the industries in durables manufacturing, the machinery industries were the strongest, growing at an average annual rate of 5.8%. The group experienced rapid growth to 1974 and a cumulative decline in 1975-1976 of 1.2%, when agricultural implements remained relatively strong. There was continuous growth from 1976 through 1981, with strong advances in 1978 and 1979. The machinery industries then declined 19% in 1982. The transportation equipment industries, dominated by motor vehicle and motor vehicle parts manufacturers, generally followed the business cycle, but with a severe decline in 1980 of 18%. In most years the wood industries followed the pattern of housing starts in the U.S. and to a lesser extent Canada. Overall growth 1971-1979 was strong, reaching a level 55% greater than 1971, despite a severe drop in 1974-1975. From

s'était située 2% au-dessous du niveau de 1971. Les niveaux de production dans cette branche d'activité sont déterminés principalement par les exigences des industries du bois et des pâtes et papiers. À son tour, la production des industries du bois est déterminée principalement par l'activité de la construction résidentielle en Amérique du Nord, laquelle s'est maintenue à des niveaux très bas depuis 1980 et a été particulièrement faible au cours de la plus grande partie de 1982.

La **pêche et le piégeage** ont augmenté à un taux annuel moyen de 3.1%. Entre 1971 et 1975, cette branche d'activité est tombée à 14% au-dessous de son niveau de 1971. Après 1975, la branche a augmenté régulièrement pour atteindre en 1979 un sommet qui dépassait de 24% le niveau de 1971. Il n'y a pas eu de croissance après 1979.

Les **mines, carrières et puits de pétrole** ont connu le plus faible taux de croissance annuelle (-0.6%) et le plus fort taux d'augmentation de l'indice implicite de prix du PIB (18.2%). La production annuelle a atteint son sommet pour les mines et ses deux composantes principales, les mines métalliques et combustibles minéraux, en 1973. Une faiblesse générale a entraîné une diminution du PIB réel de 12% dans le total des mines en 1975. Une diminution de 10% de la production minière en 1978 était reliée à des grèves; des grèves dans les mines de fer et d'autres mines métalliques ont entraîné une diminution de 26% des mines métalliques. La branche a récupéré quelque peu en 1979 et en 1980, pour baisser ensuite en 1981 et 1982. Les mines métalliques et non métalliques ont été particulièrement faibles en 1982, baissant de 24% et de 22% respectivement. Cependant, une augmentation appréciable du volume des exportations de pétrole brut a aidé à maintenir les niveaux de production des combustibles minéraux.

Les branches d'activité de la **fabrication** ont affiché un taux annuel moyen de croissance de 2.2% entre 1971 et 1982. À 8.8%, le taux de croissance de l'indice implicite de prix du PIB était inférieur à celui de l'économie totale (9.5%) au cours de la période 1971-1981. Les taux de croissance des branches d'activité productrices de biens durables et non durables ont été semblables. Cependant, les branches d'activité productrices de biens durables ont affiché un comportement plus cyclique. La fabrication de biens durables et non durables a atteint son sommet en 1974. La fabrication a augmenté de plus de 23% entre 1971 et 1974 et a diminué de 6% en 1975. Entre 1976 et 1979, la progression totale a été de 13%, suivie d'une baisse de 4% en 1980 et d'une augmentation de 2% en 1981. La fabrication a accusé une chute de 12% en 1982.

Parmi les branches d'activité productrices de biens durables, le secteur des machines a connu la croissance la plus forte avec un taux annuel moyen de 5.8%. Ce groupe a connu une croissance rapide jusqu'en 1974 et une diminution cumulée en 1975 et 1976 de 1.2%, alors que les instruments agricoles sont demeurés relativement forts. Il s'est produit une croissance continue entre 1976 et 1981, avec de fortes hausses en 1978 et 1979. Les branches d'activité productrices de machines ont alors diminué de 19% en 1982. Le secteur du matériel de transport, dominé par les fabricants de véhicules automobiles et par ceux de pièces et accessoires de véhicule automobile, a généralement suivi le cycle d'affaires, mais avec une forte diminution de 18% en 1980. La plupart des années, les industries du bois ont suivi la courbe des mises en chantier de logements aux États-Unis et dans une moindre mesure, au Canada. La croissance globale entre 1971 et 1979 a été forte, atteignant un

1979 to 1982 real output levels declined 18%. The total for the remaining durable goods industries followed the business cycle.

Non-durable manufacturing grew at an annual rate of 2.3%. The fastest growing component, with average annual growth of 4.7%, was printing, publishing and allied industries. It registered a decline only in 1982. The other strong-growing industries were the chemical industries (3.9%) and the rubber and plastics industries (3.5%), which tended to follow the general cycle. Petroleum and coal products showed strong growth to 1973, peaked in 1974, and generally declined thereafter, for an average annual growth rate of -2.4% over the whole period. The implicit price index of GDP for this major group rose to almost 350 in 1981. The remaining industries showed moderate growth (0.5% to 1.9%) over the period, although the cycle affected some more than others: the food and beverage and tobacco products industries showed less cyclical behaviour; the paper, textiles and miscellaneous manufacturing industries tended to follow the overall cycle more closely.

An average annual rate of growth of 1.7% for total **construction** masks a diversity of growth rates among its sub-components. Residential building construction was exceptionally weak with an average growth rate of -2.1%. This contrasts with 3.2% for non-residential building construction and 3.8% for engineering construction. For total construction the annual growth was quite steady until 1976 with very little growth to 1980. The industry then rose 6% in 1981 and fell 11% in 1982. For both engineering construction and non-residential building construction major projects of several years duration were common. Examples included the James Bay hydro installation, Syncrude, pipelines and construction related to the 1976 Olympics. Once underway these projects usually continued regardless of short-run economic conditions. Conversely, residential construction is much more responsive to short-run conditions.

Transportation, communication and other utilities was the second fastest growing division with an average annual growth rate of 4.6%; a decrease of 3% in 1982 was the only decline registered during the period. Transportation had an average annual growth rate of 3.0%. The most rapidly growing industry was air transport with a growth rate of 9.6%, and a low rate of price increase in gross output (7% per year). Highway and bridge maintenance was the slowest growing industry having an average annual growth rate of 0.2%. Pipeline transport also grew slowly at an annual average rate of 0.6%. It had very high rates of growth in 1972 and 1973 but was weak thereafter, partly as a result of restrictions on the export of crude oil and natural gas. The remaining industries grew at rates between 1.4% and 6.5%. Railway transport fell 8% in 1975, then grew to a peak in 1979, dropped slightly in 1980 and 1981 and declined by more than 10% in 1982.† + 1

niveau 55% supérieur à celui de 1971, malgré une forte chute en 1974-1975. Entre 1979 et 1982, les niveaux de production réels ont diminué de 18%. L'ensemble des autres branches d'activité productrices de biens durables a suivi le cycle d'affaires.

La fabrication de biens non durables a augmenté à un taux annuel de 2.3%. La composante dont la croissance a été la plus rapide, avec un taux de croissance annuel moyen de 4.7%, a été celle de l'imprimerie, édition et activités connexes, qui a baissé uniquement en 1982. Les autres branches à forte croissance ont été le secteur des produits chimiques (3.9%) et celui du caoutchouc et matières plastiques (3.5%), qui ont suivi dans l'ensemble le cycle général. Les produits du pétrole et du charbon ont affiché une forte croissance jusqu'en 1973, ont atteint leur sommet en 1974 et ont diminué d'une façon générale par la suite, pour un taux de croissance annuel moyen de -2.4% pour la période toute entière. L'indice implicite de prix du PIB pour ce groupe a presque atteint 350 en 1981. Les autres branches d'activité ont affiché une croissance modérée (0.5% à 1.9%) au cours de la période, bien que le cycle ait affecté certaines branches plus que d'autres: les secteurs des aliments et boissons et du tabac ont eu un comportement moins cyclique, tandis que ceux du papier, des textiles et de la fabrication de produits divers ont eu tendance à suivre de plus près le cycle global.

Un taux de croissance annuel moyen de 1.7% pour l'ensemble de la **construction** recouvre une diversité de taux de croissance de ses composantes. La construction d'immeubles résidentiels a été particulièrement faible, avec un taux de croissance moyen de -2.1%. Ceci contraste avec 3.2% pour la construction d'immeubles non résidentiels et 3.8% pour les travaux de génie. La croissance annuelle de l'ensemble de la construction a été très régulière jusqu'en 1976, et il y a eu ensuite très peu de croissance jusqu'en 1980. Cette branche a alors augmenté de 6% en 1981 et baissé de 11% en 1982. Dans les secteurs des travaux de génie et de la construction d'immeubles non résidentiels, les projets importants s'étendant sur plusieurs années ont été fréquents. On peut citer les installations hydro-électriques de la Baie de James, Syncrude, les pipelines et la construction reliée aux jeux Olympiques de 1976. Une fois en marche, ces projets ont habituellement continué sans égard aux conditions économiques à court terme. Par contre, la construction résidentielle est beaucoup plus sensible aux conditions à court terme.

Le secteur des transports, communications et autres services publics a connu la deuxième plus rapide croissance avec un taux de croissance annuel moyen de 4.6%; une diminution de 3% en 1982 a été la seule enregistrée au cours de la période. Les transports ont affiché un taux de croissance annuel moyen de 3%. La branche d'activité dont la croissance a été la plus rapide a été le transport aérien, avec un taux de croissance de 9.6%, et un taux peu élevé d'augmentation des prix de la production brute (7% par année). L'entretien de routes et de ponts a affiché la croissance la plus lente, avec un taux de croissance annuel moyen de 0.2%. La croissance de l'industrie du transport par pipe-line a également été lente, avec un taux annuel moyen de 0.6%. Cette industrie a connu des taux de croissance très élevés en 1972 et 1973, mais a été faible par la suite, partiellement à la suite de restrictions sur les exportations de pétrole brut et du gaz naturel. Les autres branches ont connu une croissance qui se situait entre 1.4% et 6.5%. Le transport ferroviaire a baissé de 8% en 1975, pour ensuite atteindre un sommet en 1979, baisser légèrement en 1980 et 1981 et diminuer de plus de 10% en 1982.

Communication grew at an average annual rate of 6.9%. Radio and television, telephone systems and telegraph and cable were all very strong over the period. Within telephone systems, the growth in output due to long distance calls was approximately twice that attributable to local calls. Post office was the slowest growing industry, averaging just over 2% per year. Post office was also the only component to register a decline in 1975 (9%). Electric power, gas and water utilities grew at an average annual rate of 5.3%. Electric power was the dominant industry; it grew at a rate of 5.8% per year. Electric power was affected by the 1975 slowdown and was down slightly in 1982. The growth rate of gas distribution decelerated after 1974.

Within **trade**, both retail and wholesale trade had annual average rates of growth of 3.5% and on an annual basis followed similar patterns of growth. Output increased in every year except 1982. Wholesale trade slowed more than retail during the 1975 recession, but surpassed it in terms of growth in the 1977-1979 period. There was very little growth from 1979 through 1981. In 1982 retail trade declined by 3% while wholesale trade fell 11%. The drop in output for motor vehicle dealers was 19%, and for household furniture stores 16%.

The fastest growing division of the economy was **finance, insurance and real estate**. The annual average rate of growth over the period was 4.9%. Growth was steady from 1971 to 1982. Within finance, the growth for banks and other deposit accepting institutions was relatively fast up to 1982 when there was a decline.

Output of security brokers and dealers was weak in the 1974-1975 period and then grew unevenly to a peak in 1980. It dropped in 1981 and 1982.

The output of insurance carriers rose in every year and the industry was quite strong in both 1981 and 1982. Life insurance, the largest component, grew at a substantially faster rate than property and casualty insurance.

Community, business and personal services grew somewhat faster than total GDP, advancing at an average annual rate of 3.5%. The division advanced throughout the 1971-1981 period but showed no growth in 1982 when an 8% decline in accommodation and food services offset the relatively small growth in other areas. Education and related services increased slowly during the period, showing small declines in 1978 and 1979.

Health and welfare services increased in all years. Most of the growth originated with other health services; hospitals grew slowly, and actually declined in 1976.

Les communications ont augmenté au taux annuel moyen de 6.9%. La radio et la télévision, les réseaux de téléphonie et de télégraphie et de câbles ont tous été très vigoureux au cours de la période. Dans le cas des réseaux de téléphonie, la croissance de la production imputable aux appels interurbains a été environ le double de celle qui est imputable aux appels locaux. Les postes sont le secteur dont la croissance a été la plus lente, avec une moyenne dépassant tout juste 2% par année. Il a également été le seul à enregistrer une diminution en 1975 (9%). Le secteur de l'énergie électrique, du gaz et de l'eau a progressé à un taux annuel moyen de 5.3%. L'énergie électrique a été la branche dominante, avec une croissance de 5.8% par année. L'énergie électrique a été touchée par le ralentissement de 1975 et a baissé légèrement en 1982. Le taux de croissance de la distribution du gaz a ralenti après 1974.

Dans le secteur du **commerce**, le commerce de détail et de gros ont tous deux connu des taux de croissance annuel moyen de 3.5% et ont montré des comportements de croissance semblables sur une base annuelle. La production a augmenté chaque année sauf en 1982. Le commerce de gros a ralenti plus que le commerce de détail au cours de la récession de 1975, mais a dépassé celui-ci en termes de croissance au cours de la période allant de 1977 à 1979. Il y a eu très peu de croissance entre 1979 et 1981. En 1982, le commerce de détail a diminué de 3% alors que le commerce de gros a chuté de 11%. La baisse de production des concessionnaires de véhicules automobiles a été de 19%, et celle des magasins de meubles ménagers, de 16%.

La division de l'économie qui a connu la croissance la plus rapide a été celle **des finances, assurances et affaires immobilières**, avec un taux de croissance annuel moyen au cours de cette période de 4.9%. La croissance a été continue de 1971 à 1982. Dans le secteur des finances, la croissance des banques et des autres institutions de dépôts a été relativement rapide jusqu'en 1982, où il s'est produit une diminution.

La production des courtiers et des négociants en valeurs mobilières a été faibles au cours de la période 1974-1975 et a par la suite connu une croissance inégale pour atteindre un sommet en 1980. Ce secteur a chuté en 1981 et 1982.

La production de l'industrie des assureurs a augmenté chaque année et la branche a été très forte en 1981 et 1982. L'assurance-vie, la principale composante, a augmenté à un taux nettement plus rapide que l'assurance immobilière et l'assurance risques divers.

Les services socio-culturels, commerciaux et personnels ont connu une croissance quelque peu plus vive que le PIB total, augmentant à un taux annuel moyen de 3.5%. Le secteur a augmenté tout au long de la période 1971-1981, mais n'a affiché aucune croissance en 1982 alors qu'une diminution de 8% des services d'hébergement et de restauration a annulé la croissance relativement faible d'autres secteurs. L'éducation et les services connexes ont augmenté lentement au cours de cette période, affichant de légères diminutions en 1978 et 1979.

Les services médicaux et sociaux ont augmenté chaque année. La plus grande partie de cette croissance provient des autres services de santé; les hôpitaux ont augmenté lentement et ont en fait diminué en 1976.

Services to business management was the fastest growing major group of the division. Although the growth was general throughout the group, computer services was by far the strongest component.

Accommodation and food services grew in every year except 1981 and 1982. With the exception of 1975, annual growth was relatively fast from 1971 to 1978. Total growth in 1979 and 1980 was 2% followed by virtually no change in 1981 and an 8% decline in 1982.

Public administration and defense had an average annual growth rate of 2.7%. Provincial administration was the fastest growing component, followed by local and then federal administration. Defense was below its 1971 level of output throughout the period.

Les services fournis aux entreprises ont constitué le groupe dont la croissance a été la plus rapide dans cette division. Bien que la croissance ait été générale à travers tout le groupe, les services informatiques ont de beaucoup dépassé les autres composantes.

Les services d'hébergement et de restauration ont augmenté chaque année sauf en 1981 et 1982. À l'exception de 1975, la croissance annuelle a été relativement rapide entre 1971 et 1978. La croissance totale en 1979 et 1980 a été de 2% pour demeurer pratiquement inchangée en 1981 et baisser de 8% en 1982.

L'administration publique et la défense ont connu un taux de croissance annuel moyen de 2.7%. Les administrations provinciales ont été la composante dont la croissance a été la plus rapide, suivies des administrations locales et de l'administration fédérale. La défense est demeurée au-dessous de son niveau de production de 1971 tout au long de la période.

Appendix I

DESCRIPTION OF GROSS DOMESTIC PRODUCT BY INDUSTRY

This appendix shows the 1971 Gross Domestic Product distribution, the types of indicators used, an assessment of the quality of the measures and the publication level and pattern for annual and monthly data. Quarterly data are calculated from the monthly data.

The **types of indicators** used are shown at the most detailed industry working level. A bracket indicates that the annual estimates are based on the monthly projector. A blank in the monthly indicator column denotes that no estimate is prepared at that level. The following symbols have been used for the various indicators:

- N - Value Added
- G - Gross Output
- I - Intermediate Input
- L - Labour Input
- LD - Labour and Depreciation
- O - Other
- ... - Not Applicable

The appendix also provides an **assessment of the quality of the estimates** of Gross Domestic Product at the most detailed industry working level. While it is not possible to quantify the margin of error in the estimates of Gross Domestic Product it is possible to provide a somewhat subjective indication of the quality. The following rating system is therefore offered by way of an informed opinion of the relative over-all quality of the estimates of Gross Domestic Product for each industry:

- 1 - Very Good
- 2 - Good
- 3 - Acceptable
- 4 - Poor

Appendice I

DESCRIPTION DU PRODUIT INTÉRIEUR BRUT PAR INDUSTRIE

Cet appendice présente la distribution du produit intérieur brut pour 1971, les types de projecteurs utilisés, une évaluation de la qualité des mesures et une liste des données annuelles et mensuelles publiées. Les données trimestrielles sont calculées à partir des données mensuelles.

Les **types de projecteurs** utilisés sont présentés au niveau de calcul d'industrie le plus désagregé possible. Une parenthèse indique que les estimations annuelles sont compilées à partir du projecteur mensuel. Un espace blanc dans la colonne du projecteur mensuel signifie qu'aucune estimation n'est faite à ce niveau. Les symboles suivants sont utilisés pour les projecteurs:

- N - valeur ajoutée
- B - production brute
- I - consommation intermédiaire
- T - travail
- TD - travail et dépréciation
- A - autres
- ... - n'ayant pas lieu de figurer

L'appendice présente également une **évaluation qualitative** des estimations du produit intérieur brut calculées au niveau d'industrie le plus désagregé possible. Bien qu'étant impossible de quantifier la marge d'erreur des estimations du produit intérieur brut, il est toutefois possible de fournir une indication approximative et quelque peu subjective de la qualité de ces mêmes estimations. Le système d'évaluation qui suit provient par conséquent d'une opinion informée de la qualité générale relative des estimations du produit intérieur brut pour chaque industrie:

- 1 - très bon
- 2 - bon
- 3 - acceptable
- 4 - faible

(1) See appendix 2 for contents.

(1) Voir l'appendice 2 pour le contenu.

(2) The reader should note that for the petroleum refining industry the valuation of products shipped and the resultant value added calculations are highly subjective. Because of the high degree of vertical integration, respondents have difficulty in defining a clear cut-off point between refining and marketing activities. Therefore, in many instances, artificial transfer prices define establishment limits.

(2) Le lecteur doit tenir compte de la nature subjective des données sur la valeur des produits livrés par l'industrie de raffinage du pétrole et du calcul de la valeur ajoutée qui en découle. L'importante intégration verticale qui caractérise cette industrie rend parfois difficile une distinction claire et nette entre activités de raffinage et de commercialisation. Il fut donc nécessaire, dans certains cas, de recourir à des prix de transferts artificiels pour en définir les limites.

CONTENTS OF INDUSTRY GROUPINGS

ACTIVITÉS ÉCONOMIQUES COMPRISES DANS CHAQUE AGRÉGAT

Industry groupings	SIC CAE	Agrégats des activités économiques
The industry content of these groupings is defined as follows:		Énumération des activités économiques contenues dans chaque agrégat ci-après:
Gross domestic product less agriculture: all industries less agriculture	2-11	Produit intérieur brut moins l'agriculture: toutes les industries, moins l'agriculture
Industrial production:		Production industrielle:
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Electric power, gas and water utilities	7.04	Énergie électrique, gaz et eau
Goods-producing industries:		Industries productrices de biens:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Electric power, gas and water utilities	7.04	Énergie électrique, gaz et eau
Service-producing industries:		Industries productrices de services:
Transportation, storage and communication	7 01-03	Transports, entreposage et communications
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Community, business and personal service industries	10	Services socio-culturels, commerciaux et personnels
Public administration and defence	11	Administration publique et défense
Commercial industries:		Industries commerciales:
Agriculture	1	Agriculture
Forestry	2	Forêts
Fishing and trapping	3	Chasse et pêche
Mines (including milling), quarries and oil wells	4	Mines (y compris broyage), carrières et puits de pétrole
Manufacturing industries	5	Industries manufacturières
Construction industry	6	Bâtiment et travaux publics
Transportation, communication and other utilities, less SIC 516, highway and bridge maintenance, 576-579, water systems and other utilities	7	Transports, communications et autres services publics, moins CAE 516, l'entretien de routes et de ponts, 576-579, distribution d'eau et autres services d'utilité publique
Trade	8	Commerce
Finance, insurance and real estate	9	Finances, assurances et affaires immobilières
Health and welfare services less SIC 821, hospitals, and SIC 828, welfare organizations	10 02	Services médicaux et sociaux moins CAE 821, hôpitaux, et CAE 828, organismes de bien-être
Amusement and recreation services	10 04	Divertissements et loisirs
Services to business management	10 05	Services fournis aux entreprises
Personal services less SIC 873, private households	10 06	Services personnels moins CAE 873, ménages privés
Accommodation and food services	10 07	Hébergement et restauration
Miscellaneous services	10 08	Services divers

Contents of Industry Groupings – Continued

Activités économiques comprises dans chaque agrégat – suite

Industry groupings	SIC CAE	Agrégats des activités économiques
Commercial industries less agriculture: total commercial industries less agriculture		Industries commerciales sans l'agriculture: total des industries commerciales moins l'agriculture
Non-commercial industries:		Industries non commerciales:
Highway and bridge maintenance	516	Entretien de routes et de ponts
Water systems and other utilities	576-579	Distribution d'eau et autres services d'utilité publique
Education and related services	10:01	Enseignement et services annexes
Hospitals	821	Hôpitaux
Welfare organizations	828	Organismes de bien-être
Religious organizations	10:03	Organisations culturelles
Private households	873	Ménages privés
Public administration and defence	11	Administration publique et défense
Durable manufacturing industries:		Industries manufacturières de biens durables:
Wood industries	5:08	Industrie du bois
Furniture and fixture industries	5:09	Industrie du meuble et des articles d'ameublement
Primary metals industries	5:12	Première transformation des métaux
Metal fabrication industries (except machinery and transportation equipment industries)	5:13	Fabrication de produits en métal (sauf machines et équipement de transport)
Machinery industries (except electrical machinery)	5:14	Fabrication de machines (sauf électriques)
Transportation equipment industries	5:15	Fabrication d'équipement de transport
Electrical products industries	5:16	Fabrication de produits électriques
Non-metallic mineral products industries	5:17	Fabrication de produits minéraux non-métalliques
Non-durable manufacturing industries:		Industries manufacturières de biens non durables:
Food and beverage industries	5:01	Industrie des aliments et boissons
Tobacco products industries	5:02	Industrie du tabac
Rubber and plastics products industries	5:03	Industrie du caoutchouc et des produits en matière plastique
Leather industries	5:04	Industrie du cuir
Textile industries	5:05	Industrie textile
Knitting mills	5:06	Bonneterie
Clothing industries	5:07	Industrie de l'habillement
Paper and allied industries	5:10	Industrie du papier et activités annexes
Printing, publishing and allied industries	5:11	Imprimerie, édition et activités annexes
Petroleum and coal products industries	5:18	Fabrication de produits du pétrole et du charbon
Chemical and chemical products industries	5:19	Industrie chimique
Miscellaneous manufacturing industries	5:20	Industries manufacturières diverses
Finance, insurance, real estate less royalties and imputed rent:		Finances, assurances et affaires immobilières sans les redevances et le loyer imputé:
Finance industries	9:01	Institutions financières
Insurance carriers	9:02	Assureurs
Insurance agencies and real estate industry	9:03	Agences d'assurances et affaires immobilières
Food manufacturers:		Fabricants d'aliments:
Meat and poultry products industry	101	Industries de la viande et de la volaille
Fish products industry	102	Industrie de la transformation du poisson
Fruit and vegetable processing industries	103	Préparation de fruits et de légumes
Dairy products industry	104	Industrie laitière
Flour and breakfast cereal products industry	105	Meunerie et fabrication de céréales de table
Feed industry	106	Fabrication d'aliments pour les animaux
Bakery products industries	107	Boulangerie et pâtisserie (fabrication)
Miscellaneous food industries	108	Industries alimentaires diverses

Contents of Industry Groupings – Concluded

Activités économiques comprises dans chaque agrégat – fin

Appendix IV

GLOSSARY OF MAIN TERMS

Gross Domestic Product at Factor Cost

The value of production arising within the geographical boundaries of Canada irrespective of whether the factors of production involved are resident or non-resident. The following table shows the relationship between gross national product at market prices and gross domestic product at market prices and at factor costs.

GNP at Market Prices	
Less: investment income received from non-residents	
Plus: investment income paid to non-residents	
	= GDP at Market Prices
	Less: net indirect taxes
	Less: residual error of estimate
	= GDP at Factor Cost

Indirect Taxes

Taxes assessed on producers in respect of the production, sale, purchase or use of goods and services, which they charge to the expenses of production. Also included are import duties and the operating surplus, reduced by the normal margin of profits of business units, of fiscal and similar monopolies of government.

Net Indirect Taxes

Indirect taxes less subsidies.

Subsidies

All grants on current account made by government to private industries and public corporations, and grants made by the public authorities to government enterprises in compensation for operating losses when these losses are clearly the consequence of the policy of the government to maintain prices at a level below costs of production.

Producers' Values

The value in the market of the gross output of commodities, industries, etc. at the establishment of the producers; or the sum of the values of direct inputs,

Appendice IV

GLOSSAIRE DES PRINCIPAUX TERMES UTILISÉS

Produit intérieur brut au coût des facteurs

La valeur des biens et services produits à l'intérieur des frontières géographiques du Canada, que les facteurs de production soient résidents ou non. Le tableau suivant montre la relation entre le produit national brut aux prix du marché et le produit intérieur brut aux prix du marché et au coût des facteurs.

PNB aux prix du marché	
Moins: revenus de placement reçus des non-résidents	
Plus : revenus de placement versés aux non-résidents	
	= PIB aux prix du marché
	moins: impôts indirects nets
	moins: erreur résiduelle d'estimation
	= PIB au coût des facteurs

Impôts indirects

Impôts payés par les producteurs, figurant dans leur coût de production et basés sur la production, la vente, l'achat ou l'utilisation de biens ou de services. Ces impôts comprennent les droits et taxes sur importations ainsi que les excédents d'exploitation des monopoles fiscaux et autres monopoles publics diminués de la marge bénéficiaire normale.

Impôts indirects nets

Impôts indirects diminués des subventions d'exploitation.

Subvention d'exploitation

Tous les transferts courants de l'administration au secteur privé et aux sociétés publiques et les transferts des pouvoirs publics aux entreprises publiques pour compenser leurs pertes d'exploitation lorsque celles-ci sont manifestement la conséquence de la politique des pouvoirs publics visant à maintenir des prix à un niveau inférieur aux coûts de production.

Valeur départ-usine

Valeur aux prix du marché de la production brute à la sortie de l'établissement du producteur. La valeur départ-usine de la production peut aussi être exprimée comme la somme des coûts

intermediate inputs at purchasers' values and indirect taxes less subsidies in respect of the commodities, industries, etc. The value added of industries at producers' values is equal to gross output of the industries at producers' values less the purchasers' values of the intermediate consumption in respect of the gross output.

Factor Cost, True

In the case of gross output of commodities, industries, etc. the producers' values less the sum of the indirect taxes, net, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs into the production of the commodities, industries, etc.; or the accumulation of the primary inputs, that is, compensation of employees, consumption of fixed capital and operating surplus, in respect of the commodities, industries, etc. and the direct and indirect intermediate inputs. The value added of industries at true factor values is equal to the true factor value of their gross output less the true factor value of their intermediate inputs (consumption).

Factor Cost, Approximate

In the case of the gross output of commodities, industries, etc. producers' values less the indirect taxes, net, in respect of the commodities, industries, etc.; or the sum of the primary inputs and the purchasers' value of the intermediate inputs. In the case of the value added of industries, the gross output of the industries valued at approximate factor values less the purchasers' value of the intermediate inputs into the industries.

Domestic Territory

In addition to the territory lying within the political frontiers of a country, (i) ships and aircraft operated by residents of the country entirely, or primarily, between two or more countries; (ii) fishing vessels, oil and natural gas rigs, and floating platforms operated by residents of the country wholly, or mainly, in international waters or engaged in extraction in areas in which the country has the exclusive right of exploitation by virtue of international agreements or pronouncements; and (iii) the embassies, consulates and military establishments of the country located abroad.

Establishment

For purposes of economic production, the establishment as a statistical unit is defined as:

The smallest operating entity which produces as homogeneous a set of goods and services as possible and for which records provide data on the value of output together with the cost of materials used and cost and quantity of labour resources employed to produce the output, and for which records or estimated allocations can provide the full range of production account variables to calculate "value added".

des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation), des impôts indirects, nets des subventions d'exploitation, et de la consommation intermédiaire aux prix d'acquisition. La valeur départ-usine de la valeur ajoutée d'une branche est égale à la valeur départ-usine de la production de cette branche diminuée de la consommation intermédiaire de celle-ci aux prix d'acquisition.

Valeur exacte au coût des facteurs

La valeur exacte au coût des facteurs de la production brute est égale à la différence entre la valeur départ-usine de la production et la somme des impôts indirects — nets des subventions d'exploitation — relatifs à la production et à la consommation intermédiaire directe et indirecte. On peut aussi l'exprimer comme la somme des coûts des facteurs de production (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) incorporés dans la valeur du produit: c'est-à-dire la somme des coûts des facteurs utilisés dans la production des entrées intermédiaires directes et indirectes et des coûts des facteurs utilisés dans la production du produit. La valeur exacte au coût des facteurs de la valeur ajoutée est égale à la différence entre les valeurs exactes au coût des facteurs de la production et de la consommation intermédiaire.

Valeur approchée au coût des facteurs

La valeur approchée au coût des facteurs de la production est égale à la valeur de cette production aux prix départ-usine diminuée des impôts indirects — nets des subventions d'exploitation — frappant cette production. On peut encore exprimer la valeur approchée au coût des facteurs de la production comme la somme des coûts des facteurs (rémunération des salariés, consommation de capital fixe, excédent net d'exploitation) et de la consommation intermédiaire aux prix d'acquisition. La valeur approchée au coût des facteurs de la valeur ajoutée d'une branche est égale à la valeur approchée au coût des facteurs de la production de cette branche moins la consommation intermédiaire aux prix d'acquisition.

Territoire économique

Outre le territoire délimité par les frontières politiques d'un pays, le territoire économique comprend: (i) les navires et les avions entièrement ou essentiellement exploités par des résidents d'un pays entre deux ou plusieurs pays, (ii) les bateaux de pêche, les derricks pour l'extraction du pétrole et du gaz naturel et les plates-formes flottantes exploités entièrement ou essentiellement par des résidents d'un pays dans les eaux internationales ou exploités dans des zones où le dit pays possède un droit exclusif d'exploitation en vertu d'accords ou de décisions internationaux et (iii) les ambassades, les consulats et les établissements militaires du pays à l'étranger.

Établissement

Comme outil servant à mesurer la production économique, l'établissement, en tant qu'unité statistique, est défini comme:

La plus petite entité opérationnelle dont la production de biens et services est aussi homogène que possible et pour laquelle les données sont disponibles sur la valeur de sa production, le coût des matériaux utilisés et le coût et la quantité de main-d'oeuvre utilisée dans la production; les données doivent aussi être disponibles ou l'allocation par estimation rendue possible pour le reste de la gamme complète des variables du compte de production qui servent au calcul de la "valeur ajoutée".

Producers

All resident establishments and similar units, public as well as private, which produce goods and services for sale at a price which is normally intended to cover their cost of production; government units engaged in selling goods and services to the public which are characteristically commodities though as a matter of policy, the prices set for the items do not approximate the costs of production; activities such as government establishments, owner-occupied dwellings, which produce similar goods or services and use similar processes and resources as the typical industries though they do not produce for the market; resident units which both acquire financial assets and incur liabilities in the market; and bodies which mainly furnish social and community services free of charge, or at sales prices which are not intended to cover fully the costs of producing the services, and which are not entirely, or mainly, financed and controlled by the public authorities and all departments, establishments and other bodies of federal, provincial and local governments which engaged in such activities as administration, defence, health, educational and social services, and promotion of economic growth whether accounted for, or financed in ordinary or extraordinary budgets or extra-budgetary funds. Includes social security schemes in respect of large sections of the community imposed, controlled or financed by government, non-profit institutions entirely, or mainly financed and controlled by general government or mainly serving general government, and embassies, consulates and military establishments of a country located abroad.

Commodities

Goods and services normally intended for sale on the market at a price that is designed to cover their cost of production. Includes all goods and services produced by industries, all imported goods and services as well as goods and services which are not normally sold in the market at a price intended to cover their cost of production. These items consist of most of the gross output of producers of government services and non-profit services to households, the domestic services rendered by one household to another.

Gross Output of Industries

In general, the value in the market of all the goods and services (commodities) produced during a period of account, including work-in-progress and products for use on own account. Valuation is usually at producers' values, that is the market value at the establishment of the producer, or at approximate basic values, that is producers' values less the relevant commodity taxes, net; the insurance service charge in the case of casualty and life insurance; and the sum of the actual and imputed service charges in the case of banks and similar financial institutions. The gross output of the producers of government services and private non-profit services to households is equivalent to the purchasers' values of the intermediate consumption, compensation of employees, consumption of fixed capital of these producers. The

Producteurs

Tous les établissements résidents et les unités du même type, publics ou privés, qui produisent des biens et services pour la vente, à un prix destiné normalement à couvrir leur coût de production; les unités des administrations publiques vendant à la population des biens et des services qui sont manifestement des biens et services marchands, bien que, pour des raisons de politique générale, leur prix de vente n'atteigne pas leur coût de production; les activités telles que les entreprises publiques et les logements occupés par leurs propriétaires qui, bien qu'elles ne produisent pas pour le marché, fournissent des produits analogues à ceux des branches d'activité marchande et mettent en oeuvre des procédés et des moyens de production du même type que ceux des dites branches; les unités résidentes qui empruntent sur le marché et acquièrent des actifs financiers; les organismes qui, principalement, fournissent aux ménages des services sociaux et des services collectifs soit gratuitement, soit moyennant un prix de vente qui n'est pas destiné à couvrir entièrement le coût de production de ces services, et qui ne sont pas entièrement ou principalement financés et contrôlés par les pouvoirs publics et l'ensemble des ministères, des organismes et des autres services de l'administration (centrale ou locale) qui s'occupent de l'administration de la défense, de la santé, de l'enseignement et des services sociaux, de la promotion de la croissance économique, qu'ils soient couverts ou financés par des budgets ordinaires ou extraordinaires, ou par des fonds extra-budgétaires. Cet agent comprend les régimes de sécurité sociale destinés à de grands groupes de la collectivité qui sont imposés, contrôlés ou financés par les pouvoirs publics, les institutions sans but lucratif financées entièrement ou à titre principal par les administrations publiques ou contrôlées par elles et celles qui fournissent principalement des services à ces administrations ainsi que les ambassades, les consulats et les établissements militaires d'un pays situés à l'extérieur.

Biens et services marchands

Biens et services destinés normalement à être vendus sur le marché à un prix calculé pour couvrir leur coût de production. Sont marchands tous les biens et services produits par les branches d'activité marchande, tous les biens et services importés, ainsi que les biens et services qui ne sont pas normalement vendus sur le marché à un prix destiné à couvrir leur coût de production. Ces biens et services comprennent la plus grande partie de la production des branches non marchandes des administrations publiques et des institutions sans but lucratif au service des ménages, c'est-à-dire les services domestiques des ménages.

Production brute des branches d'activité marchande

D'une manière générale, on définit la production brute des branches d'activité comme la valeur sur le marché de tous les biens et services (marchands), achevés ou en cours, qu'elles ont produits, pour la vente ou pour leur propre compte, au cours d'une période comptable. On calcule généralement la valeur de la production aux prix départ-usine et la valeur de base approchée de la production. La valeur de la production aux prix départ-usine est sa valeur sur le marché à la sortie de l'établissement producteur. La valeur de base approchée de la production est égale à la valeur départ-usine diminuée des taxes — nettes des subventions d'exploitation — affectées aux produits. La production des services d'assurance-dommages et d'assurance-vie est définie par la rémunération des services d'assurances. La production des banques et des institutions financières analogues est égale à la somme des rémunérations, effectives ou imputées,

gross output of domestic services rendered by households consists of the compensation of employees only.

Intermediate Input of Industries

Goods and services (commodities) used in production, including repair and maintenance of the capital stock, research, development and prospecting, indirect outlays on financing capital formation, such as floatation costs for loans, and transfer costs involved in purchases and sales of land, intangible assets and financial claims.

Intermediate Input of Producers of Government Services

Acquisitions (purchases and transfers in kind) of new goods and services (mainly commodities) on current account, less net sales of similar second-hand goods and scraps and wastes therefrom, including durable goods acquired primarily for military purposes.

Intermediate Input of Producers of Private Non-Profit Services to Households

Acquisitions (purchases and transfers in kind) of new goods and services (commodities) less net sales of similar second-hand goods and scraps and wastes therefrom. Excluded are second-hand goods received for distribution to households without renovation or alteration.

Operating Surplus

Gross output at producers' values less the sum of intermediate consumption, compensation of employees, consumption of fixed capital and indirect taxes reduced by subsidies.

Factor Incomes

Compensation of employees by, and net operating surplus of, producers. The net domestic product is often valued at factor incomes.

Labour Income

All compensation (wages, salaries, supplementary labour income) earned by employees residing in Canada or employed abroad by the Federal Government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers.

des services bancaires. La production des branches non marchandes des administrations publiques et des institutions privées sans but lucratif est égale à la valeur départ-usine de la consommation intermédiaire, de la rémunération des employés et de la consommation de capital fixe de ces producteurs. La production brute des services domestiques des ménages comprend seulement la rémunération des employés.

Entrées intermédiaires des branches d'activités marchandes

Biens et services marchands consommés dans la production, y compris la réparation et l'entretien courant du stock de capital, la recherche, le développement et la prospection, les dépenses indirectes pour le financement de la formation de capital telles que les frais d'émission des emprunts et les frais de mutation encourus lors de l'achat et de la vente de créances.

Entrées intermédiaires des branches non marchandes des administrations publiques

Acquisitions (achats et transferts en nature) de biens neufs et de services (principalement des biens et services marchands) en compte courant, y compris les biens durables acquis principalement à des fins militaires, diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts et de déchets.

Entrées intermédiaires des branches non marchandes des institutions privées sans but lucratif au service des ménages

Acquisitions (achats et transferts en nature) de biens neufs et de services (biens et services marchands) diminuées des ventes — nettes des achats — de biens analogues d'occasion, de rebuts ou de déchets. Les biens d'occasion reçus pour être distribués gratuitement aux ménages, sans remise à neuf ni transformation, ne sont pas compris dans les ventes nettes de biens d'occasion.

Excédent net d'exploitation

Différence entre la production aux prix départ-usine et la somme de la consommation intermédiaire, de la rémunération des salariés, de la consommation de capital fixe et des impôts indirects diminués des subventions d'exploitation.

Revenus des facteurs

Rémunération des salariés par les producteurs et excédent net d'exploitation de ces derniers. Le produit intérieur net est souvent évalué aux revenus des facteurs.

Revenu du travail

La rémunération totale (salaires, traitements, revenu supplémentaire du travail) versée aux salariés demeurant au Canada ou aux personnes employées à l'étranger par l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les agriculteurs ne font pas partie du revenu du travail.

Wages and salaries

Earnings from employment for work performed. Included are: directors fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retroactive wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc.

Supplementary Labour Income

Payments made by employers for the future benefit of their employees, comprising employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

Royalty

Payment for concessions, the use of patented or copyrighted materials, and similar rights; treated as income from property.

Accrual Basis

The item, for example, outlay, income, obligation, other flow, is recorded as of the time at which it is incurred or earned.

Cash Basis

The item, for example, outlay, income, other receipt, is recorded as of the time at which the payment is actually made or received.

Current Repairs and Maintenance

Outlays for repairs to fixed assets. Includes outlays on new parts and attachments of fixed assets which have an expected life of use of one year or somewhat more but which are short-lived relative to the fixed asset itself, or are of relatively small value. Major alterations in, or additions to, machinery, equipment, structures or other fixed assets which significantly extend their expected life-time of use, productivity, or the character or volume of the services they render, are considered capital acquisitions.

Final Use of Goods and Services

The disposition of goods and services to final consumption expenditure, gross fixed capital formation, increases in stocks and exports.

Salaires et traitements

Les gains d'un emploi en retour du travail exécuté comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, les revenus en nature, les allocations imposables et les rappels de salaire. Les estimations de salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc.

Revenu supplémentaire du travail

Paiements effectués par l'employeur dans l'intérêt futur de ses salariés, c'est-à-dire les cotisations de l'employeur aux régimes de prévoyance et aux caisses de retraite, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

Redevances, revenus des actifs incorporels r.d.a.

Droits de concession, paiement pour l'utilisation de brevets, droits d'auteur, etc. Ces redevances sont traitées comme un revenu de la propriété.

Comptabilité d'exercice

La grandeur considérée, qu'il s'agisse d'une dépense, d'un revenu, de l'obligation d'un paiement ou de tout autre flux, est enregistrée au moment où elle est engagée (dans le cas d'une dépense) ou gagnée (dans le cas d'une recette).

Comptabilité de caisse

La grandeur considérée: dépense, revenu, autre recette, est enregistrée au moment du paiement ou de la recette même.

Entretien courant

Dépenses pour les réparations des actifs fixes. Les achats de pièces et d'accessoires dont la valeur est relativement faible ou dont la durée de vie est d'un an ou légèrement supérieure à un an, mais de toute façon inférieure à celle de l'équipement principal, sont inclus dans les dépenses d'entretien courant. Modifications ou additions importantes apportées aux machines, au matériel, aux constructions et aux autres actifs fixes qui en augmentent notablement la durée d'utilisation ou la productivité, modifient la nature des services qu'ils rendent ou en accroissent le volume.

Emplois finals de biens et services

Consommation finale, formation brute de capital fixe, variation des stocks et exportation.

SIC CAE	Industry Industrie	Matrix number numbers - Numéro de matrice					
		1130		1131			
		Quarterly Trimestrielle		Monthly Mensuelle			
		Constant dollars seasonally adjusted at annual rates	Constant dollars without seasonal adjustment at quarterly rates	Indexes seasonally adjusted	Indexes without seasonal adjustment	Constant dollars seasonally adjusted at annual rates	
		Dollars constants désaison- nalisés aux taux annuels	Dollars constants non désaison- nalisés aux taux trimestriels	Indices désaison- nalisés	Indices non désaison- nalisés	Dollars constants désaison- nalisés aux taux annuels	
		databank numbers - numéros dans la banque de données					
174	Shoe factories - Fabriques de chaussures	D 143854	D 144026	D 144198	D 144370		
5 05	Textile industries - Industrie textile	D 143855	D 144027	D 144199	D 144371		
181	Cotton yarn and cloth mills - Filature et tissage du coton	D 143856	D 144028	D 144200	D 144372		
183	Man-made fibre, yarn and cloth mills - Fabrication de fibres, filés et tissus artificiels et synthétiques	D 143857	D 144029	D 144201	D 144373		
5 06	Knitting mills - Bonneterie	D 143858	D 144030	D 144202	D 144374		
5 07	Clothing industries - Industrie de l'habillement	D 143859	D 144031	D 144203	D 144375		
243	Men's clothing industries - Industrie des vêtements pour hommes	D 143860	D 144032	D 144204	D 144376		
244	Women's clothing industries - Industrie des vêtements pour dames	D 143861	D 144033	D 144205	D 144377		
245	Children's clothing industry - Industrie des vêtements pour enfants	D 143862	D 144034	D 144206	D 144378		
5 08	Wood industries - Industrie du bois	D 143863	D 144035	D 144207	D 144379		
251	Sawmills, planing mills and shingle mills - Scieries, ateliers de rabotage et usines de bardeaux	D 143864	D 144036	D 144208	D 144380		
252	Veneer and plywood mills - Fabriques de placages et de contre-plaques	D 143865	D 144037	D 144209	D 144381		
254	Sash, door and other millwork plants - Industrie des portes, châssis et autres bois ouvrés	D 143866	D 144038	D 144210	D 144382		
5 09	Furniture and fixture industries - Industrie du meuble et des articles d'ameublement	D 143867	D 144039	D 144211	D 144383		
261	Household furniture manufacturers - Industrie des meubles de maison	D 143868	D 144040	D 144212	D 144384		
5 10	Paper and allied industries - Industrie du papier et activités annexes	D 143869	D 144041	D 144213	D 144385		
271	Pulp and paper mills - Usines de pâtes et papiers	D 143870	D 144042	D 144214	D 144386		
273	Paper box and bag manufacturers - Fabricants de boîtes en carton et de sacs en papier	D 143871	D 144043	D 144215	D 144387		
274	Miscellaneous paper converters - Transformations diverses du papier	D 143872	D 144044	D 144216	D 144388		
5 11	Printing, publishing and allied industries - Imprimerie, édition et activités annexes	D 143873	D 144045	D 144217	D 144389		
286- 287	Commercial printing; platemaking, typesetting and trade bindery industry - Imprimerie commerciale; industrie de clichage, de la composition et de la reliure commerciale	D 143874	D 144046	D 144218	D 144390		
288- 289	Publishing only; publishing and printing - Édition seulement; édition et impression	D 143875	D 144047	D 144219	D 144391		
5 12	Primary metal industries - Première transformation des métaux	D 143876	D 144048	D 144220	D 144392		
291	Iron and steel mills - Siderurgie	D 143877	D 144049	D 144221	D 144393		
292	Steel pipe and tube mills - Fabriques de tubes et tuyaux d'acier	D 143878	D 144050	D 144222	D 144394		
294	Iron foundries - Fonderies de fer	D 143879	D 144051	D 144223	D 144395		
295	Smelting and refining - Fonte et affinage	D 143880	D 144052	D 144224	D 144396		
5 13	Metal fabricating industries (except machinery and transportation equipment industries) - Fabrication de produits en métal (sauf machines et équipement de transport)	D 143881	D 144053	D 144225	D 144397		
303	Ornamental and architectural metal industry - Industrie des produits métalliques d'architecture et d'ornement	D 143882	D 144054	D 144226	D 144398		
304	Metal stamping, pressing and coating industry - Industrie de l'emboutissage, du matriçage et de revêtement des métaux	D 143883	D 144055	D 144227	D 144399

databank numbers - numéros dans la banque de données							
305	Wire and wire products manufacturers - Industrie du fil métallique et de ses produits	D 143884	D 144056	D 144228	D 144400		
306	Hardware, tool and cutlery manufacturers - Fabricants de quincaillerie, d'outillage et de coutellerie	D 143885	D 144057	D 144229	D 144401		
309	Miscellaneous metal fabricating industries - Fabrication de produits métalliques divers	D 143886	D 144058	D 144230	D 144402		
5:14	Machinery industries (except electrical machinery) - Fabrication de machines (sauf électriques)	D 143887	D 144059	D 144231	D 144403		
315	Miscellaneous machinery and equipment manufacturers - Fabricants de machines et d'équipement divers	D 143888	D 144060	D 144232	D 144404		
5:15	Transportation equipment industries - Fabrication d'équipement de transport	D 143889	D 144061	D 144233	D 144405		
321	Aircraft and aircraft parts manufacturers - Fabricants d'aéronefs et de pièces	D 143890	D 144062	D 144234	D 144406		
323	Motor vehicle manufacturers - Fabricants de véhicules automobiles	D 143891	D 144063	D 144235	D 144407		
325	Motor vehicle parts and accessories manufacturers - Fabricants de pièces et accessoires d'automobiles	D 143892	D 144064	D 144236	D 144408		
326	Railroad rolling stock industry - Fabricants de matériel ferroviaire roulant	D 143893	D 144065	D 144237	D 144409		
327	Shipbuilding and repair - Construction et réparation de navires	D 143894	D 144066	D 144238	D 144410		
5:16	Electrical products industries - Fabrication de produits électriques	D 143895	D 144067	D 144239	D 144411		
332	Manufacturers of major appliances (electric and non-electric) - Fabricants de gros appareils (électriques ou non)	D 143896	D 144068	D 144240	D 144412		
334	Manufacturers of household radio and television receivers - Fabricants de radiorécepteurs et de téléviseurs ménagers	D 143897	D 144069	D 144241	D 144413		
335	Communications equipment manufacturers - Fabricants d'équipement de télécommunication	D 143898	D 144070	D 144242	D 144414		
336	Manufacturers of electrical industrial equipment - Fabricants d'équipement électrique industriel	D 143899	D 144071	D 144243	D 144415		
338	Manufacturers of electric wire and cable - Fabricants de fils et de câbles électriques	D 143900	D 144072	D 144244	D 144416		
339	Manufacturers of miscellaneous electrical products - Fabricants de produits électriques divers	D 143901	D 144073	D 144245	D 144417		
5:17	Non-metallic mineral products industries - Fabrication de produits minéraux non métalliques	D 143902	D 144074	D 144246	D 144418		
352	Cement manufacturers - Fabricants de ciment	D 143903	D 144075	D 144247	D 144419		
354	Concrete products manufacturers - Fabricants de produits en béton	D 143904	D 144076	D 144248	D 144420		
355	Ready-mix concrete manufacturers - Fabricants de béton préparé	D 143905	D 144077	D 144249	D 144421		
5:18	Petroleum and coal products industries - Fabrication de produits du pétrole et du charbon	D 143906	D 144078	D 144250	D 144422		
5:19	Chemical and chemical products industries - Industrie chimique	D 143907	D 144079	D 144251	D 144423		
374	Manufacturers of pharmaceuticals and medicines - Fabricants de produits pharmaceutiques et de médicaments	D 143908	D 144080	D 144252	D 144424		
375	Paint and varnish manufacturers - Fabricants de peintures et vernis	D 143909	D 144081	D 144253	D 144425		
376	Manufacturers of soap and cleaning compounds - Fabricants de savon et de produits de nettoyage	D 143910	D 144082	D 144254	D 144426		
378	Manufacturers of industrial chemicals - Fabricants de produits chimiques industriels	D 143911	D 144083	D 144255	D 144427
